# Brasso Metal Polish Wadding - 75g

**Variant code: 06-306**

**Brasso Metal Polish Wadding** is a convenient, ready-to-use **metal cleaning and polishing solution** designed to remove tarnish and restore a brilliant, long-lasting shine to metal surfaces. Suitable for **brass, copper, stainless steel and chrome**, it helps maintain the appearance of household fittings, decorative metalwork and professional equipment.

Featuring **pre-impregnated polishing wadding**, the product combines cleaning fluid and application material in one convenient format. Simply remove a small amount of wadding and rub it onto the metal surface to loosen tarnish, dirt and discolouration. The integrated polishing solution eliminates the need for a separate cloth to apply the polish, making regular metal maintenance quick and straightforward.

Trusted for **over a century**, Brasso is a well-established name in metal care. Designed to deliver excellent polishing results and a **longer-lasting shine**, this traditional metal polish is supplied in a practical **75g tin**, ideal for domestic, commercial and professional maintenance applications.

## Product Features

- **Pre-impregnated polishing wadding** combines metal polish and application material in one product.
- **Effective tarnish removal** helps restore dull and discoloured metal surfaces.
- **Multi-metal compatibility** suitable for brass, copper, stainless steel and chrome.
- **Long-lasting shine** helps maintain the appearance of polished metalwork.
- **Ready-to-use formulation** requires no mixing or dilution.
- **Convenient application** allows small amounts of wadding to be removed as required.
- **No separate application cloth required** as the polishing solution is already impregnated into the wadding.
- **Traditional metal care product** with more than 100 years of heritage.
- **Compact 75g tin** provides convenient

storage between polishing tasks.

## Product Benefits

- **Restores metal appearance** helps bring back the natural shine of tarnished surfaces.
- **Simple polishing process** reduces preparation time with pre-treated wadding.
- **Versatile metal maintenance** provides one product for several commonly used metals.
- **Longer-lasting polished finish** helps keep metal fittings and decorative items looking their best.
- **Controlled application** allows users to remove only the amount of wadding needed.
- **Convenient storage** keeps the remaining impregnated wadding together in its tin.
- **Suitable for regular maintenance** supports the upkeep of household and commercial metalwork.

## Technical Characteristics

- **Brand:** Brasso
- **Product Type:** Metal Polish Wadding
- **Product Format:** Cleaning Liquid Impregnated into Wadding
- **Pack Size:** 75g
- **Packaging:** Tin
- **Physical State:** Liquid Impregnated Wadding
- **Colour:** Yellowish-Brown
- **Odour:** Characteristic
- **pH:** 9–10.5
- **Density:** 0.915–0.930g/cm³ at 20°C
- **Dynamic Viscosity:** 15–25mPa·s
- **Flash Point:** 43°C, Closed Cup
- **Suitable Metals:** Brass, Copper, Stainless Steel and Chrome
- **Cleaning Action:** Tarnish Removal and Metal Polishing
- **Finish:** Long-Lasting Shine
- **Application Method:** Manual Polishing with Impregnated Wadding
- **Dilution:** None Required
- **Intended Use:** Domestic and Professional Metal Maintenance

## Applications

**Area of Use:** Ideal for polishing **brass ornaments, copper fittings, stainless steel accessories,**

Tel: 01626 355177
Email: info@aukhygiene.com

**chrome fixtures, decorative metalwork, household hardware and compatible metal equipment**. Suitable for use in **homes, hotels, hospitality venues, offices, maintenance departments and commercial premises**.

**How to Use:** Remove a small piece of **pre-impregnated polishing wadding** from the tin. Gently rub the metal surface using even movements to remove tarnish and discolouration. Allow the polishing action to work, then buff with a **separate clean, soft, dry cloth** to remove residue and achieve a bright, polished finish. Replace the lid securely after use to help prevent the remaining wadding from drying out.

**Application Considerations:** Test on a small, inconspicuous area before treating delicate, plated, coated or unfamiliar surfaces. Follow the surface manufacturer's care instructions and avoid excessive rubbing on sensitive finishes. Although the impregnated wadding eliminates the need for a separate application cloth, a clean cloth is recommended for final buffing.

**Safety: Flammable liquid and vapour.** Use only outdoors or in a well-ventilated area and keep away from heat, sparks, open flames and other ignition sources. Avoid breathing vapours, which may cause drowsiness or dizziness. Wear suitable protective gloves, avoid unnecessary skin and eye contact, and wash hands after handling. Keep out of reach of children and follow the product label and current Safety Data Sheet.
