SC Johnson Deb InstantFOAM® Complete - Alcohol-Based Foam Hand Sanitiser - Case of 3 x 1L

Variant code: 10-IFS1LTFEN

SC Johnson Deb InstantFOAM® Complete is a professional alcohol-based foam hand sanitiser designed to provide **rapid and highly effective hand disinfection** in hygiene-sensitive environments. Suitable for workplaces, healthcare settings, food facilities and public environments, the advanced foam formulation delivers broad-spectrum antimicrobial protection while remaining pleasant and comfortable for frequent daily use.

The highly effective sanitising formula is proven to kill **99.999% of many common germs** and has been fully tested for bactericidal, virucidal, yeasticidal and mycobactericidal performance. Dispensed as an instant foam, the product spreads rapidly across the hands for complete coverage while preventing the dripping and splashing often associated with liquid or gel alcohol sanitisers.

Unlike traditional gel sanitisers, the formula contains **no gelling agents**, helping prevent sticky residue after repeated use. The rich foam texture is pleasant for frequent application and encourages regular hygiene compliance in busy environments. Its perfume-free and dye-free formulation is ideal for sensitive skin users and has been independently tested to help prevent skin dryness during frequent use.

Certified as **skin hypoallergenic** and awarded the **ECARF quality seal**, the product is suitable for sensitive and eczema-prone skin. It is also suitable for use in food handling environments and compatible with latex, vinyl and nitrile gloves. The fast-drying no-rinse formula makes it ideal for use wherever immediate hand sanitising is required.

Product Features

- Professional **alcohol-based foam hand sanitiser**
- Kills **99.999% of many common germs**
- Broad-spectrum antimicrobial activity
- Instant foam action prevents dripping and splashing
