Rentokil Fast Action Mouse Killer - Twin Pack

Variant code: 06-PSF135

Rentokil Fast Action Mouse Killer - Twin Pack is a **fast-acting rodenticide** designed to control mouse infestations in homes and other indoor environments. Its highly palatable bait contains **alphachloralose**, which is formulated to kill mice within 24 hours of feeding.

Each pack contains **two ready-to-use, pre-baited boxes**, with sufficient bait in each box to kill up to 50 mice. The complete twin pack provides enough bait to control up to **100 mice**, depending on infestation conditions.

The **tamper-resistant bait boxes** help restrict access by children and pets, while keeping the bait securely enclosed. No direct bait handling is required, making this a convenient solution for **indoor mouse control**.

Product Features

- **Fast-acting formula** designed to kill mice within 24 hours of feeding.
- **Two pre-baited boxes** supplied per pack.
- **Up to 50 mice per box** under suitable conditions.
- **Up to 100 mice per twin pack**.
- **Tamper-resistant design** helps restrict access to bait.
- **No bait handling required** for convenient use.
- **Indoor use only**.

Product Benefits

- **Rapid mouse control** helps manage infestations.
- **Ready-to-use boxes** simplify placement.
- **Enclosed bait** reduces direct handling.
- **Two-box pack** allows treatment at separate locations.
- **Protective housing** helps limit unintended access.
- **Convenient format** for household pest management.

Technical Characteristics

- **Brand:** Rentokil
- **Product Type:** Mouse Killer Bait Station
- **Pack Size:** Twin Pack
- **Contents:** 2 Pre-Baited Boxes
- **Active Ingredient:** Alphachloralose
- **Bait Type:** Solid Rodenticide Blocks
- **Action:** Kills Within 24 Hours of Feeding
- **Claimed Capacity:** Up to 50 Mice Per Box
- **Maximum Claimed Pack Capacity:** Up to 100 Mice
- **Housing:** Tamper-Resistant
- **Bait Handling:** Not Required
- **Area of Use:** Indoors Only

Applications

Area of Use: Suitable for **homes, kitchens, cupboards, lofts, garages, sheds and other enclosed spaces** where mice are present.

How to Use: Place the pre-baited boxes where mouse activity has been observed, particularly against walls, beneath cupboards or behind furniture. Follow the product label for placement, monitoring and disposal.

Safety: Although the tamper-resistant design helps restrict access, **the bait is poisonous and must be kept away from children, pets and non-target animals**. Remove dead rodents and dispose of used bait as directed. **Always read the label and use biocides safely.**

Property	Value
Colour	Green
Fragrance	Odourless
Usage Instructions	Ideal locations for use are where mice have been seen running, such as against walls, under cupboards, behind furniture in loft spaces, garages and sheds.
Do's & Don'ts	Use as soon as infestation occurs. Always read the label and product information before use. Use biocides safely.
