# Scrubbing Floor Pad - 24" - Green

**Variant code: 03-S24G**

**Scrubbing Floor Pad - Green** is a professional floor cleaning pad designed for wet scrubbing, deep cleaning and removing stubborn dirt from heavily soiled hard floors. Ideal for commercial floor maintenance, it delivers effective cleaning performance and can also be used to knock back existing floor polish before recoating.

Designed for use with low-speed rotary floor machines and scrubber dryers, the green pad provides an intermediate abrasive action that removes ingrained dirt, grease and surface contamination. It is particularly effective on heavily soiled or difficult-to-clean floors. Always use the pad wet for optimum cleaning performance.

The pad can remove surface layers of polish during floor preparation but is not aggressive enough for complete polish stripping. Avoid using it on polished floors where the existing finish needs to be preserved. Its durable construction allows use on both sides, helping maximise pad life and cleaning efficiency.

## Product Features

- **Professional green wet scrubbing floor pad**
- 24-inch (610mm) diameter
- Intermediate abrasive cleaning action
- Removes stubborn dirt, grease and grime
- Suitable for knocking back polish before recoating
- Double-sided for extended use
- Designed for rotary machines and scrubber dryers

## Product Benefits

- Provides effective deep cleaning of heavily soiled floors
- Helps prepare existing floor finishes for recoating
- Improves cleaning efficiency and floor appearance
- Suitable for demanding commercial floor maintenance
