Windmill Glass Wash - Glass Detergent for Enclosed Glass Washing Machines - 2 x 5L

Variant code: 04-492

Windmill Glass Wash is a high-performance detergent designed to deliver **effective cleaning and bright, streak-free results** in automatic glasswashing machines. Developed for professional environments, it ensures reliable cleaning performance across a wide range of conditions.

This **high active, low foaming formulation** effectively removes general soiling, residues and marks from drinking glasses, leaving them clean and clear. It is specially formulated to **maintain beer head retention**, ensuring glassware is suitable for use in bars and hospitality settings without affecting beverage quality.

Suitable for use in **all types of enclosed glasswashing machines**, the product performs consistently across different water conditions. Its controlled foam properties support efficient machine operation and consistent wash cycles.

Supplied in a **2 x 5L format**, it is ideal for high-volume environments requiring dependable and economical glasswashing performance.

Product Features

- Detergent for **automatic glasswashing machines**
- **High active, low foaming formulation**
- Removes general soiling and residues
- Leaves glassware **clean and bright**
- Maintains **beer head retention**
- Suitable for all water conditions

Product Benefits

- Ensures clear, professional presentation of glassware
- Maintains beverage quality in hospitality environments
- Supports efficient machine operation
- Provides consistent results across water conditions
- Ideal for high-use bar and catering settings
