MotorScrubber - UK 3-Pin Charger Assembly - Genuine Replacement Charger

Variant code: 16-MS1580-3

MotorScrubber UK Charger Assembly is a **genuine replacement battery charger** designed to provide safe, reliable and efficient charging for compatible **MotorScrubber cleaning machines**. Engineered to maintain optimum battery performance, this charger ensures your equipment remains powered and ready for professional cleaning operations.

Featuring a standard **UK 3-pin plug assembly**, the charger offers simple and convenient connection to mains power, making battery charging straightforward in commercial, industrial and public sector environments. Designed to work seamlessly with compatible MotorScrubber battery systems, it delivers consistent charging performance to help maximise battery life and operational reliability.

Built to professional standards, the charger is ideal as a replacement for an existing unit or as an additional charger for busy cleaning teams requiring multiple charging locations. Its durable construction ensures dependable long-term performance in demanding cleaning environments.

As a genuine MotorScrubber accessory, the UK Charger Assembly provides the compatibility and reliability required to keep your cleaning equipment operating at peak efficiency.
