MotorScrubber - Pad Holder Drive Board

Variant code: 16-MS1046

MotorScrubber Pad Holder Drive Board is a genuine replacement **Velcro® drive plate** designed for use with **MotorScrubber cleaning machines**. Engineered to securely hold all compatible MotorScrubber cleaning pads, this drive board provides a firm attachment for fast, efficient pad changes while ensuring optimum cleaning performance across a wide range of floor surfaces.

Featuring a durable hook-and-loop (Velcro®) surface, the drive board allows cleaning pads to be attached and removed in seconds without the need for tools. The robust construction ensures reliable pad retention during operation, making it ideal for demanding commercial cleaning applications where productivity and performance are essential.

Designed for professional use, the MotorScrubber Pad Holder Drive Board is suitable for use with the full range of MotorScrubber cleaning pads, enabling users to switch quickly between scrubbing, polishing and cleaning tasks while maintaining maximum machine efficiency.

Product Features

- Genuine MotorScrubber pad holder drive board
- Velcro® drive plate for secure pad attachment
- Compatible with all MotorScrubber cleaning pads
- Quick pad changes without tools
- Strong hook-and-loop fastening system
- Durable commercial-grade construction
- Maintains secure pad retention during operation
- Easy to install and replace

Product Benefits

- **Allows fast and secure attachment of cleaning pads**
- **Compatible with the full range of MotorScrubber pads**
- **Improves productivity through rapid pad changes**
