DRYFT Core-Ion Replacement Battery - For DRYFT Cleaning System

Variant code: 16-005-0011

DRYFT Core-Ion Replacement Battery is a **genuine rechargeable lithium-ion battery pack** designed to keep your **DRYFT cleaning system** operating at peak performance. Engineered for reliable power delivery and extended runtime, this replacement battery ensures uninterrupted cleaning productivity while maintaining the cordless convenience that makes the DRYFT system so efficient and easy to use.

Designed as a direct replacement for the original Core-Ion battery, this rechargeable power pack provides dependable performance for professional cleaning applications. Whether replacing a worn battery or keeping a spare charged and ready for extended cleaning shifts, the Core-Ion battery helps minimise downtime and maximise operational efficiency.

The lightweight and compact design integrates seamlessly with the DRYFT system, allowing quick battery changes and hassle-free operation. Manufactured to the highest standards, the battery delivers consistent power output and reliable performance throughout demanding commercial cleaning tasks.

Ideal for professional cleaners, facilities management teams and contract cleaning companies, the DRYFT Core-Ion Replacement Battery helps ensure your DRYFT machine remains ready for use whenever needed.

Product Features

- **Genuine DRYFT Core-Ion replacement battery**
- Rechargeable lithium-ion technology
- Direct replacement for original battery pack
- Lightweight and compact design
- Quick and easy battery installation
- Reliable commercial-grade performance

Product Benefits

- **Provides dependable cordless power**
