Peek Cream Polish - 50ml Tube

Variant code: 06-305

Peek Cream Polish is a versatile **multi-surface metal polish** designed to clean, polish and protect a wide range of metal and hard surfaces. Its fine polishing action helps remove tarnish, oxidation, discolouration and surface deposits, restoring a bright, polished finish to everyday household items, decorative metalwork and professional equipment.

Suitable for **brass, silver, copper, gold, chrome, stainless steel, bronze, pewter and aluminium**, this multipurpose polishing cream can also be used on compatible **fibreglass, ceramic, acrylic and other non-porous surfaces**. It is particularly useful for maintaining electroplated items such as **chrome kettles, taps, toasters and kitchen fittings**, as well as silver-plated trophies and decorative accessories.

As well as cleaning and polishing, the formulation leaves a **light protective coating** that helps inhibit oxidation and maintain the appearance of treated surfaces. Supplied in a convenient **50ml tube**, it is easy to apply in small quantities, making it a practical choice for routine polishing, restoration and maintenance. Not suitable for anodised metals.

Product Features

- **3-in-1 cleaning action** cleans, polishes and protects treated surfaces.
- **Fine polishing formulation** helps remove tarnish, oxidation and discolouration.
- **Multi-metal compatibility** suitable for brass, silver, copper, gold, chrome, stainless steel, bronze, pewter and aluminium.
- **Suitable for electroplated surfaces** including chrome taps, kettles, toasters and silver-plated items.
- **Versatile hard surface use** suitable for compatible fibreglass, ceramic and acrylic surfaces.
- **Protective finish** leaves a light coating that helps inhibit further oxidation.
- **Simple cream application** allows controlled polishing using a soft cloth.
- **Compact 50ml tube** convenient for

storage and occasional polishing tasks.
- **Suitable for domestic and professional use** across a variety of polishing applications.

Product Benefits

- **Restores surface shine** helps revive dull, tarnished and discoloured metalwork.
- **Longer-lasting protection** helps reduce the effects of surface oxidation.
- **Versatile cleaning performance** reduces the need for separate polishes for different metals.
- **Suitable for decorative finishes** provides a practical solution for maintaining chrome and silver-plated items.
- **Easy application** makes routine polishing straightforward.
- **Improved presentation** helps maintain clean, polished household fittings, ornaments and equipment.
- **Convenient tube packaging** allows controlled dispensing and helps minimise product waste.

Technical Characteristics

- **Brand:** Peek
- **Product Type:** Multi-Surface Metal Polish
- **Product Form:** Cream/Paste
- **Pack Size:** 50ml Tube
- **Physical State:** Solid (SDS Classification)
- **Colour:** White
- **Odour:** Amine-Like
- **Relative Density:** 1.20
- **Absolute Density:** Not Available in SDS
- **Kinematic Viscosity:** 7,500mm²/s
- **Flash Point:** 60–93°C
- **Polishing Action:** Fine Abrasive
- **Surface Protection:** Light Coating to Help Inhibit Oxidation
- **Suitable Metals:** Brass, Silver, Copper, Gold, Chrome, Stainless Steel, Bronze, Pewter and Aluminium
- **Other Suitable Surfaces:** Compatible Fibreglass, Ceramic, Acrylic and Other Non-Porous Materials
- **Surface Restrictions:** Not Suitable for Anodised or Lacquered Metals
- **Application Method:** Apply and Buff with a Soft Cloth
- **Intended Use:** Domestic and Professional Polishing and Maintenance

Applications

Area of Use: Ideal for **homes, hotels, restaurants, commercial kitchens, workshops, maintenance departments and restoration applications**. Suitable for polishing **chrome taps, stainless steel fittings, kettles, toasters, silverware, trophies, decorative metalwork, brass fixtures, ceramic surfaces and compatible fibreglass items**.

How to Use: Apply a small amount of polishing cream to a **clean, soft, dry or slightly damp cloth**. Rub the surface gently but firmly to remove tarnish, oxidation and surface deposits. **Do not allow the polish to dry on the surface.** Buff with a separate clean, soft, dry cloth to remove residue and achieve a bright finish. Repeat if necessary for heavily tarnished areas.

Application Considerations: Do not use on **anodised or lacquered metals**. Test on a small, inconspicuous area before treating delicate, plated, coated or unfamiliar finishes. Avoid excessive pressure on thin electroplated coatings, as repeated abrasive polishing may cause wear. Follow the manufacturer's care instructions for sensitive surfaces.

Safety: Follow the product label and current **Safety Data Sheet**. Use in a well-ventilated area and avoid inhaling vapours. The SDS warns that exposure may cause drowsiness or dizziness. Wear appropriate protective equipment where required, avoid unnecessary skin and eye contact, and keep out of reach of children. Prevent release into the environment and store securely in the original container.

Property	Value
Fragrance	Amine-like
CLP	irritant
