Prochem Nylon Upholstery Brush - Stiff

Variant code: 09-PA3406

Prochem Nylon Hand Brush - Stiff is a professional handheld cleaning brush designed for general carpet cleaning applications. Manufactured with **stiff synthetic fibres**, the brush provides effective mechanical agitation to help loosen dirt and debris from compatible carpet fibres, particularly in areas that are difficult to access with larger cleaning equipment.

The compact handheld design allows controlled cleaning of **carpeted stairs, edges, corners and confined areas**. Its stiff bristles assist in working suitable carpet cleaning solutions into the fibres and loosening embedded dirt before extraction or further cleaning treatment.

Suitable for professional carpet cleaning contractors, commercial cleaning companies and housekeeping teams, the brush provides a practical and reusable accessory for routine carpet maintenance, targeted cleaning and detailed agitation.

Product Features

- **Stiff synthetic nylon bristles** provide effective mechanical agitation for general carpet cleaning applications.
- **Handheld brush design** allows controlled cleaning of localised areas.
- **Compact construction** enables access to carpeted stairs, edges, corners and confined spaces.
- **Effective fibre agitation** helps loosen dirt and debris before further cleaning treatment.
- **Lightweight design** provides convenient handling during manual cleaning tasks.
- **Reusable construction** suitable for repeated use when appropriately cleaned and maintained.
- **Cleaning solution compatibility** complements suitable professional carpet cleaning products.
- **Manual operation** requires no electrical power or specialist machinery.

Product Benefits

Tel: 01626 355177
Email: info@aukhygiene.com

- **Improved carpet cleaning performance** helps loosen embedded dirt through controlled mechanical agitation.
- **Enhanced cleaning accessibility** allows effective treatment of areas that larger cleaning equipment may struggle to reach.
- **Improved cleaning solution distribution** helps work compatible cleaning products into carpet fibres.
- **Reduced cleaning effort** provides targeted agitation when treating stubborn areas of soiling.
- **Convenient handling** supports detailed cleaning of carpeted stairs, edges and confined spaces.
- **Economical reusable design** provides a practical accessory for regular professional cleaning operations.
- **Versatile professional application** supports routine carpet maintenance, pre-treatment and localised deep cleaning.

Technical Characteristics

- **Brand:** Prochem
- **Product Type:** Nylon Hand Brush
- **Bristle Material:** Synthetic Nylon Fibre
- **Bristle Stiffness:** Stiff
- **Weight:** 100g
- **Pack Quantity:** 1 Brush
- **Product Format:** Handheld Cleaning Brush
- **Primary Function:** Carpet Cleaning and Mechanical Agitation
- **Secondary Function:** Loosening Dirt and Distributing Cleaning Solutions
- **Surface Compatibility:** Compatible Carpets and Durable Textile Surfaces
- **Application Method:** Manual Brushing and Agitation
- **Cleaning Product Compatibility:** Suitable Carpet Cleaning and Pre-Treatment Solutions
- **Reusable:** Yes
- **Cleaning and Maintenance:** Rinse After Use and Allow to Dry
- **Storage Conditions:** Store in a Clean, Dry Location
- **Intended Use:** Professional Carpet Cleaning and Maintenance

Applications

Area of Use: Ideal for **professional carpet cleaning contractors, commercial cleaning**

companies, hotels, hospitality establishments, facilities management teams and housekeeping departments. Particularly suitable for cleaning carpeted stairs, edges, corners, skirting board areas and confined spaces where larger carpet cleaning equipment may be impractical. The stiff synthetic bristles provide effective agitation on compatible, durable carpet fibres.

How to Use: Remove loose surface debris before cleaning. Where required, apply a suitable carpet cleaning or pre-treatment solution according to the manufacturer's instructions. Use the **Prochem Nylon Hand Brush** to gently agitate the affected carpet fibres, helping loosen embedded dirt and distribute the cleaning solution. Work in controlled movements and apply appropriate pressure according to the carpet construction. Complete the cleaning process using a suitable extraction or dirt removal method. Rinse the brush after use and allow it to dry before storage.

Application Considerations: Always check carpet and textile care instructions before cleaning. Test the brush on a small, inconspicuous area to establish surface compatibility. Due to its stiff bristle construction, avoid excessive pressure on delicate upholstery, fragile carpet fibres, loosely woven textiles and sensitive decorative fabrics. Use a softer brush where gentle agitation is required. Always select cleaning solutions appropriate for the material being treated.
