Rentokil Window Fly Trap - Pack of 4

Variant code: 06-FW35

Rentokil Advanced Window Fly Traps - Pack of 4 provide a simple, effective and insecticide-free solution for attracting and trapping flies in homes, conservatories and greenhouses. Designed as convenient **adhesive window stickers**, these discreet fly traps help control unwanted flying insects without the need for chemical insecticide sprays, powders or aerosols. Their practical design makes them ideal for households seeking an easy-to-use method of managing everyday fly activity.

Specially developed to **attract and capture flies**, the window stickers use a sticky trapping surface to retain insects that come into contact with them. Positioned directly onto suitable window glass, they help reduce the number of flies moving around indoor spaces. The **insecticide-free construction** provides a straightforward alternative to conventional chemical fly treatments, making the traps particularly useful in living areas, kitchens, conservatories and greenhouses where flying insects can become a nuisance.

Supplied in a convenient **pack of four window fly trap stickers**, these ready-to-use traps require no batteries, electrical connections or additional equipment. Each sticker can be applied directly to a suitable window and removed when required, leaving **no trace on the glass** when removed as directed. Suitable for use throughout the home and in greenhouses, they offer a practical, low-maintenance solution for controlling fly activity while avoiding the use of insecticidal active ingredients.

Product Features

- **Insecticide-free fly control** attracts and traps flies without chemical insecticidal ingredients.
- **Adhesive window sticker design** provides a convenient method of capturing unwanted flying insects.
- **Effective fly trapping surface** retains insects that come into contact with the adhesive.
- **Ready-to-use application** requires no mixing, spraying or specialist equipment.

- **Clean removal** designed to leave no trace on window glass when removed correctly.
- **Suitable for domestic use** ideal for rooms throughout the home, including conservatories.
- **Greenhouse compatibility** provides a practical method of managing fly activity in enclosed growing environments.
- **Non-electrical operation** requires no batteries, cables or power supply.
- **Odourless construction** provides fly control without adding fragrance to the surrounding environment.
- **Pack of four stickers** allows placement on multiple suitable windows or replacement as required.

Product Benefits

- **Insecticide-free protection** helps manage flying insects without applying insecticidal chemicals around the home.
- **Effective physical trapping** captures flies on contact with the adhesive surface.
- **Simple installation** allows stickers to be applied directly to suitable window glass.
- **Minimal maintenance** eliminates the need for electrical operation or routine refilling.
- **Clean and convenient removal** allows used traps to be replaced without leaving adhesive marks when removed correctly.
- **Versatile household applications** suitable for domestic rooms, conservatories and greenhouses.
- **Practical four-pack supply** provides multiple traps for use in different locations.

Technical Characteristics

Hazardous
- **Primary Function:** Attracting and Trapping Flies
- **Target Pest:** Flies
- **Application Method:** Peel-and-Stick Window Application
- **Suitable Surface:** Window Glass
- **Suitable Environments:** Homes, Conservatories and Greenhouses
- **Power Requirement:** None
- **Removal Method:** Peel Off Window Surface
- **Intended Use:** Indoor Fly Control

Applications

Area of Use: Ideal for **homes, kitchens, living rooms, bedrooms, conservatories and greenhouses** where flies frequently gather around windows. The adhesive stickers provide a convenient method of controlling flying insects in enclosed environments without the need for insecticidal sprays. They are particularly useful near windows where flies are naturally attracted to daylight and regularly come into contact with the glass.

How to Use: Select a suitable window where **fly activity** is frequently observed. Ensure the glass is clean and dry before application. **Peel away the backing paper** and position the sticker directly onto the window. Carefully remove the front protective paper to expose the trapping surface, following the instructions supplied with the product. Leave the sticker in place to attract and capture flies. When the trap requires replacement, carefully peel it away from the glass, wrap it in paper and dispose of it appropriately.

Application Considerations: Designed specifically for **window-based fly trapping** and should be applied only to suitable glass surfaces. Avoid placing stickers where they may be touched accidentally by children, pets or household occupants. Do not position the adhesive surface where it may come into contact with curtains, furnishings or other materials. For best results, install traps in areas where flies are commonly observed and replace them when the adhesive surface becomes heavily covered with insects or debris. Maintain good household hygiene and remove potential fly-attracting waste to support effective insect control.

Safety: Insecticide-free and not classified as hazardous under the applicable chemical

classification criteria. Avoid unnecessary contact with the adhesive surface and wash hands after handling used traps. Keep unused stickers in their original packaging and out of reach of children. Do not allow the adhesive to contact food, food preparation surfaces or animal feeding areas. Remove used traps carefully and dispose of them in accordance with local waste requirements. Always read and follow the product packaging instructions before application.

Property	Value
Usage Instructions	This product can be used indoors.
Do's & Don'ts	Follow the pack instructions. Peel off the backing paper and place the sticker on the window. Peel off the front paper and the sticker is now ready to use. Simply remove by peeling off the sticker, wrapping it in paper and disposing in a bin with a s
