Selden Penetrating and Release Spray Aerosol - 480ml

Variant code: 06-K008

Selden Penetrating & Release Spray Aerosol - 480ml is a **professional penetrating lubricant and release spray** designed to free seized metal components, loosen corroded fixings and support routine machinery maintenance. Its powerful penetrating action helps release stubborn nuts, bolts and mechanical parts affected by rust and corrosion.

Formulated with a **specialised blend of oils, solvents and additives**, this versatile maintenance spray **lubricates, protects and helps prevent seizure**. It also helps prevent further corrosion and oxidation, making it suitable for maintaining metal components and facilitating machinery reassembly.

Supplied in a convenient **480ml aerosol can**, the spray is safe for use on all metals and will not attack plastic cables. The supplied **extension tube** allows precise application to confined spaces and hard-to-reach components.

Product Features

- **Powerful penetrating action** helps release seized and corroded metal parts.
- **Lubricates and protects** mechanical components.
- **Helps prevent seizure** during machinery operation and maintenance.
- **Corrosion and oxidation protection** helps prevent further deterioration.
- **Safe on all metals** and will not attack plastic cables.
- **Extension tube** enables precise application in inaccessible areas.
- **CFC-free formulation** contains no chlorofluorocarbons.
- **Convenient 480ml aerosol** for professional maintenance.

Product Benefits

- **Releases stubborn fixings** to simplify repairs and maintenance.
- **Reduces maintenance effort** when

loosening seized components.
- **Protective lubrication** helps maintain moving metal parts.
- **Prevents further corrosion** to support component longevity.
- **Facilitates machine reassembly** after servicing.
- **Targeted application** helps reach difficult access points.
- **Versatile performance** suits industrial and engineering applications.

Technical Characteristics

- **Brand:** Selden
- **Product Type:** Penetrating & Release Spray Aerosol
- **Volume:** 480ml
- **Form:** Aerosol Spray
- **Composition:** Blend of Oils, Solvents and Specialised Additives
- **Appearance:** Clear Spray
- **Density:** 0.73
- **Fragrance:** Sweet Characteristic Odour
- **Propellant:** Butane
- **Pressure:** 40 psi
- **Stability:** Minimum 2 Years
- **Surface Compatibility:** All Metals and Plastic Cables
- **Environmental Characteristic:** CFC-Free
- **Application Accessory:** Extension Tube
- **Usage:** Professional Use Only

Applications

Area of Use: Ideal for **engineering workshops, industrial maintenance, machinery servicing, mechanical repairs and equipment maintenance**. Suitable for loosening seized nuts, bolts, metal fittings and other corroded mechanical components.

How to Use: Fit the **extension tube** to the spray head and shake well before each application. Spray directly onto the seized or corroded component and **leave for a few minutes** to allow the fluid to penetrate before attempting to release it. Use the extension tube to reach inaccessible parts. Repeat as necessary, following the product instructions.

Safety: For professional use only. Store the pressurised container away from direct sunlight and temperatures exceeding **50°C**. Keep away from heat, sparks and ignition sources. Use with adequate ventilation and follow the product safety

data sheet.

Property	Value
Appearance	Liquid
Fragrance	Characteristic
Volume (ml)	480
Area of Use	Ideal for engineering workshops, industrial maintenance, machinery servicing, mechanical repairs and equipment maintenance. Suitable for loosening seized nuts, bolts, metal fittings and other corroded mechanical components.
CLP	corrosive, irritant
How to Use	Fit extension tube to spray head. Shake well before each spraying. Spray seized part, leave a few minutes for fluid to penetrate before attempting to free. Use extension tube to reach inaccessible parts.
Chemical Colour	Colourless
