Prochem K-Valve with Trigger - Replacement Spray Control Valve for Extraction Wands

Variant code: 16-CM5001

Prochem K-Valve with Trigger is a **genuine replacement spray control valve** designed for use with compatible **Prochem carpet cleaning and extraction wands**. Engineered to provide precise control of cleaning solution flow, this replacement component helps maintain the performance, reliability and efficiency of professional carpet cleaning equipment.

Featuring an integrated trigger mechanism, the K-Valve allows operators to accurately control solution application during carpet and upholstery cleaning tasks. The ergonomic design ensures comfortable operation while enabling consistent spray delivery for effective cleaning and extraction performance.

Manufactured from durable professional-grade materials, the valve is designed to withstand the demands of regular commercial use. It serves as a direct replacement for worn, damaged or faulty valves, helping restore wand functionality and maintain optimum cleaning results.

As a genuine Prochem replacement part, the K-Valve with Trigger ensures correct fitment, dependable operation and long service life when installed on compatible carpet cleaning wands.

Product Features

- **Genuine Prochem replacement K-Valve**
- Integrated trigger control mechanism
- Designed for carpet cleaning extraction wands
- Controls cleaning solution flow
- Durable professional-grade construction
- Direct replacement component
- Easy installation on compatible wands
- Genuine Prochem spare part

Product Benefits

- **Restores proper spray and solution control**
- **Ensures consistent cleaning solution application**
