Twister Floor Pad Orange 15" - Pack of 2

Variant code: 03-212229

The **Twister Orange Diamond Floor Pads - 15"** are specialist floor maintenance pads designed for **deep cleaning, surface preparation and the restoration of suitable hard floors**. Featuring diamond abrasive technology, these pads provide effective mechanical cleaning to help remove accumulated dirt and surface imperfections while preparing flooring for subsequent polishing stages. Their orange abrasive grade makes them suitable for the initial stages of a progressive diamond floor treatment programme.

Designed for use with **compatible rotary floor cleaning machines and scrubber dryers**, the Twister Orange pads are used with water to provide controlled abrasive cleaning. Their diamond-based cleaning action helps improve the condition of suitable hard floor surfaces, particularly where routine maintenance alone is insufficient. The orange grade is intended for **initial restoration and surface refinement**, with finer Twister pads used afterwards where a smoother, higher-gloss finish is required.

Measuring **15" (381mm) in diameter**, these pads are suitable for professional floor maintenance in commercial and public environments. They offer a practical solution for cleaning contractors and facilities management teams carrying out periodic floor restoration or preparing floors for ongoing diamond pad maintenance. Supplied in a convenient **pack of 2 pads**, they can be incorporated into a structured hard floor cleaning and polishing programme.

Product Features

- **Twister Orange diamond floor pads** for professional hard floor maintenance
- **15" (381mm) diameter** for compatible floor cleaning equipment
- **Diamond abrasive technology** for mechanical cleaning and surface preparation
- **Orange abrasive grade** for initial floor restoration stages
- Suitable for **deep cleaning and surface**

refinement
- Helps remove **accumulated dirt and surface imperfections** from compatible hard floors
- Designed for **wet cleaning with water**
- Suitable for use with **compatible rotary floor machines and scrubber dryers**
- Can be incorporated into a **progressive diamond floor polishing system**
- Prepares suitable floors for subsequent treatment with **finer-grade polishing pads**
- Suitable for **commercial and professional floor restoration**
- Supplied in a **pack of 2 pads**

Product Benefits

- **Diamond abrasive cleaning action helps remove ingrained dirt and improve the condition of suitable hard floor surfaces**
- **Orange restoration grade provides an effective preparation stage before progressing to finer diamond polishing pads**
- **Water-based cleaning supports floor maintenance without relying on additional polishing chemicals for suitable applications**
- **15-inch diameter** provides compatibility with appropriately sized floor cleaning machines
- **Deep cleaning capability** helps address floors requiring more intensive maintenance than routine cleaning
- **Progressive polishing compatibility** supports structured floor restoration programmes
- **Mechanical surface refinement** helps prepare flooring for improved appearance and subsequent polishing
- **Wet cleaning operation** supports controlled cleaning when used according to floor and equipment instructions
- **Pack of 2 pads** provides a convenient supply for professional floor maintenance operations
- Suitable for **commercial cleaning contractors and facilities management teams**

Technical Characteristics

- **Product Range:** Twister
- **Product Type:** Diamond Floor Cleaning and Restoration Pad

Tel: 01626 355177

- **Pad Colour:** Orange
- **Pad Grade:** Restoration and Surface Preparation
- **Diameter:** 15" (381mm)
- **Abrasive Technology:** Diamond-Based
- **Cleaning Method:** Wet Use with Water
- **Machine Compatibility:** Appropriately Sized Rotary Floor Cleaning Machines and Scrubber Dryers
- **Primary Application:** Hard Floor Deep Cleaning and Restoration
- **Additional Applications:** Surface Preparation and Progressive Diamond Polishing
- **Suitable Surfaces:** Compatible Hard Flooring Approved for Diamond Abrasive Treatment
- **Pack Quantity:** 2 Pads
- **Packaging:** Pack of 2

Applications

The **Twister Orange Diamond Floor Pads - 15" - Pack of 2** are designed for **deep cleaning, surface preparation and restoration of compatible hard flooring** in professional environments such as **offices, schools, hotels, hospitals, shopping centres, retail premises and commercial buildings**. Their diamond abrasive action makes them particularly useful when floors require more intensive cleaning or preparation before progressing to finer polishing grades. Use the pads **wet with water** and a compatible floor cleaning machine, selecting the appropriate operating speed and cleaning procedure according to the equipment and flooring manufacturers' instructions. The orange grade can be incorporated into a **multi-stage diamond floor restoration programme** to help prepare the surface for subsequent polishing and ongoing maintenance. Always test on an inconspicuous area before use, particularly on delicate, coated or highly polished flooring.
