Ultra High Speed Thermal Floor Pad - Beige - 18"

Variant code: 03-S18BT

The **Ultra High Speed Thermal Floor Pads - Beige** are professional floor burnishing pads designed for **thermal buffing, high-speed polishing and restoring a high-gloss floor finish**. Developed for use with compatible ultra-high-speed floor burnishing machines, these pads help improve the appearance of suitable finished hard floors by enhancing surface gloss and maintaining a smooth, polished appearance. Available in **18" and 19" diameters**, they provide two size options for professional floor maintenance equipment.

The **thermal burnishing action** works with the movement and friction generated by high-speed floor polishing to enhance the shine of compatible floor finishes. Beige thermal pads are particularly suited to **soft to medium floor finishes** where a high-gloss appearance is required. They can be used for **dry burnishing** or with an appropriate spray buffing or floor restorer product, depending on the floor finish and maintenance requirements.

Designed for **commercial and professional floor care**, these pads are suitable for maintaining polished floors in areas where appearance is important. Their ultra-high-speed polishing application makes them a practical choice for routine burnishing programmes and final floor finishing. With **18-inch and 19-inch options**, operators can select the appropriate diameter for their machine while helping maintain a consistent, attractive floor finish.

Product Features

- **Ultra-high-speed thermal floor pads** for professional burnishing and polishing
- Available in **18" (457.2mm) and 19" (482.6mm)** diameters
- **Beige polishing grade** for high-gloss floor maintenance
- Designed for **thermal buffing and burnishing**
- Helps **restore and enhance floor shine**
- Particularly suitable for **soft to medium floor finishes**
- Suitable for **dry burnishing** on

Suitable Spray Buffing
- **Primary Application:** Thermal Floor Burnishing
- **Additional Applications:** High-Speed Polishing and Floor Shine Maintenance
- **Recommended Floor Finish:** Suitable Soft to Medium Floor Finishes
- **Desired Finish:** High Gloss
- **Available Size Options:** 2

Applications

The **Ultra High Speed Thermal Floor Pads - Beige** are designed for **thermal burnishing, dry polishing and high-gloss floor maintenance** in commercial and public environments, including **offices, hotels, shopping centres, retail premises, schools, hospitals and public buildings**. They are particularly suitable for maintaining compatible **soft to medium floor finishes** where a smooth, glossy appearance is required. The pads can be used dry or with an appropriate floor restorer or spray buffing product, depending on the maintenance procedure. Available in **18" and 19" diameters**, they should be used with correctly sized ultra-high-speed floor burnishing equipment. For best results, remove loose dirt and debris before polishing, keep the machine moving during operation and follow the flooring and equipment manufacturers' recommendations to avoid excessive heat or damage to the floor finish.
