Windmill Machine Alusafe Dishwash - Aluminium Safe Dishwash Detergent - 20L

Variant code: 04-952

Windmill Machine Alusafe Dishwash is a specialist dishwasher detergent developed to deliver **effective cleaning performance while protecting aluminium items** in professional warewashing environments. It is designed for use in automatic dishwashing machines where mixed loads require safe and reliable cleaning.

This concentrated formulation effectively removes **food residues, grease and general soiling**, leaving crockery, cutlery and glassware clean and bright. Its aluminium-safe composition ensures that **sensitive items such as aluminium cookware and utensils are protected** during the wash cycle, preventing damage or dulling.

Suitable for use in **all water conditions**, the detergent provides consistent performance across varying environments. The **low foaming formulation** supports efficient machine operation, maintaining stable wash cycles and improving overall cleaning efficiency.

Designed for use in **automatic and enclosed cabinet dishwashers**, the product is ideal for professional kitchens requiring dependable and versatile cleaning solutions. Supplied in a **20L format**, it is suitable for high-volume applications where cost efficiency and performance are essential.

Product Features

- Aluminium-safe **machine dishwasher detergent**
- Concentrated formulation for effective cleaning
- Suitable for **all water conditions**
- Low foaming for efficient machine operation
- Effective on crockery, cutlery and glassware
- Designed for automatic dishwashing systems

Product Benefits

Tel: 01626 355177
Email: info@aukhygiene.com

- Protects aluminium items during washing
- Delivers consistent cleaning performance
- Supports efficient and reliable machine cycles
- Suitable for mixed wash loads
- Reduces need for multiple detergents
- Ideal for high-use professional environments

Technical Characteristics

- Suitable for **automatic dishwashing machines**
- Compatible with enclosed cabinet systems
- Low foam formulation for controlled operation
- Effective across varying water conditions
- Designed for aluminium-safe applications
