Vanish Liquid Stain Removal - 4L

Variant code: 08-376

Vanish Liquid Stain Remover - 4L is a powerful, fast-acting laundry additive developed to remove stubborn stains and help keep clothing and washable fabrics looking clean and smelling fresh. Its specialist **oxygen-based stain removal formulation** contains hydrogen peroxide and surfactants to assist in breaking down stains and lifting contamination from fabric fibres. Suitable for domestic and professional laundry environments, it enhances the cleaning performance of conventional laundry detergent, even at lower washing temperatures.

The versatile liquid formulation offers **three application methods: in-wash stain removal, direct pre-treatment and soaking**. This flexibility allows users to select the most appropriate treatment depending on the severity of staining and individual fabric care requirements. Suitable for compatible coloured and white fabrics, including washable wool and silk where permitted by the care label, it provides an effective solution for everyday laundry maintenance and more demanding stain removal applications.

Supplied in a convenient **professional 4-litre bottle**, this laundry stain remover is ideal for hotels, restaurants, care homes, commercial laundries, hospitality establishments and households with frequent washing requirements. Adding the recommended dose alongside regular laundry detergent helps tackle stains during the washing process, while pre-treatment and soaking provide additional cleaning action for heavily stained items. Its liquid format allows convenient measuring and application without the need to dissolve a powdered stain remover beforehand.

Product Features

- **Powerful stain removal formulation** helps tackle stubborn stains and everyday fabric contamination.
- **Fast-acting liquid formula** supports effective stain treatment before and during laundering.
- **Oxygen-based cleaning action** contains hydrogen peroxide to assist in breaking down stains.

- **Three-in-one application versatility** suitable for in-wash treatment, pre-treatment and soaking.
- **Low-temperature performance** provides effective stain removal during cooler washing programmes.
- **Colour-safe formulation** suitable for compatible colourfast and white washable fabrics when used as directed.
- **Versatile fabric compatibility** suitable for washable wool and silk, subject to individual fabric care instructions.
- **Detergent performance enhancement** provides additional stain removal action alongside regular laundry detergent.
- **Non-biological formulation** delivers stain removal through oxygen-based cleaning agents.
- **Professional 4-litre format** provides a practical supply for frequent laundry applications.

Product Benefits

- **Enhanced laundry cleanliness** helps remove visible stains and maintain the appearance of washable textiles.
- **Fresh-smelling fabrics** supports a clean and pleasantly fresh laundry finish.
- **Flexible stain treatment** allows users to select the most suitable application method according to staining severity.
- **Potential energy savings** effective low-temperature performance supports cooler washing programmes where appropriate.
- **Improved laundry presentation** helps maintain the appearance of clothing, bedding, towels and table linen.
- **Convenient application** liquid formulation allows straightforward measuring, dispensing and pre-treatment.
- **Economical professional packaging** provides a bulk supply for regular stain removal and laundry maintenance.

Technical Characteristics

- **Brand:** Vanish Professional
- **Manufacturer:** Reckitt
- **Product Type:** Liquid Laundry Stain Remover
- **Capacity:** 4L
- **Pack Quantity:** 1 x 4L
- **Container Type:** Bottle

- **Physical State:** Liquid
- **Colour:** Pink Violet
- **Odour:** As Standard
- **pH:** 4-4.6
- **Density:** 1.03 ± 0.01g/ml at 20°C
- **Viscosity:** 200 ± 30cP at 20°C
- **Water Solubility:** High
- **Formulation:** Oxygen-Based Stain Removal Liquid
- **Active Cleaning Ingredient:** Hydrogen Peroxide
- **Additional Cleaning Ingredients:** Surfactants
- **Detergent Type:** Non-Biological Laundry Additive
- **Primary Function:** Laundry Stain Removal
- **Application Methods:** In-Wash, Pre-Treatment and Soaking
- **Fabric Compatibility:** Compatible White and Colourfast Washable Fabrics
- **In-Wash Dosage:** 100ml in Addition to Regular Laundry Detergent
- **Soaking Dilution:** 100ml per 4L of Water
- **Maximum Pre-Treatment Time:** 10 Minutes
- **Maximum Soaking Time for Coloured Fabrics:** 1 Hour
- **Maximum Soaking Time for White Fabrics:** 6 Hours
- **Chemical Stability:** Stable Under Normal Handling and Storage Conditions
- **Intended Use:** Domestic and Professional Laundry Treatment

Applications

Area of Use: Ideal for domestic and professional laundry operations in **hotels, restaurants, care homes, hospitality establishments, commercial laundries and residential properties**. Suitable for stain removal from compatible washable clothing, uniforms, bedding, towels, napkins and table linen. Particularly useful where conventional laundry detergent requires additional stain removal performance to maintain clean and presentable textiles.

How to Use: For **in-wash treatment**, add 100ml of stain remover alongside regular laundry detergent and select an appropriate washing programme. For **pre-treatment**, apply the product directly to the stained area and leave for a maximum of 10 minutes before washing with detergent and the recommended dose of stain remover. For **soaking**, add 100ml of product to 4 litres of water. Soak compatible coloured fabrics for a maximum of 1

hour and white fabrics for a maximum of 6 hours. Gently rub the stained area where appropriate, then rinse thoroughly or launder according to the product instructions. Always follow the dosage and treatment directions on the current product label.

Application Considerations: Always check individual garment care labels before treatment and test colourfastness on an inconspicuous area where necessary. **Do not allow the product to dry onto fabrics.** Avoid exceeding the recommended pre-treatment or soaking times. Take particular care when treating delicate materials, wool and silk, and only use the application method permitted by the fabric care instructions. Do not use on garments requiring dry cleaning only. The product is designed to supplement regular laundry detergent rather than replace it. Avoid exposing treated fabrics to direct sunlight or heat before thoroughly rinsing or washing.

Safety: Contains hydrogen peroxide and surfactants. Avoid contact with eyes and prolonged skin exposure. Wear suitable protective gloves and eye protection when handling the undiluted product, particularly in professional environments. If eye contact occurs, rinse immediately with plenty of water and seek urgent medical attention. If swallowed, rinse the mouth, do not induce vomiting and seek medical advice. Do not mix with chlorine bleach, hypochlorite-based products or other incompatible cleaning chemicals. Store in the original container in a cool, dry and well-ventilated location, away from direct sunlight, heat and incompatible materials. Keep out of reach of children and unauthorised users. Always follow the current product label and applicable workplace COSHH procedures.

Property	Value
Fragrance	Characteristic
Dilution	You choose how to use this versatile stain remover - in the wash, pre-treat or soak your fabrics.
pH	4-4.6
Area of Use	Automatic washing machines and hand washing
CLP	corrosive
