Windmill Skin Barrier Cream Unperfumed - 300ml

Variant code: 10-856

Windmill Skin Barrier Cream is an **unperfumed skin protection cream** designed to help protect hands from workplace contaminants while maintaining skin health and comfort. Ideal for use in industrial, commercial and food handling environments, this effective barrier cream forms a protective layer on the skin to help reduce the effects of repeated exposure to dirt, oils, grease, detergents and other workplace substances.

The non-greasy formulation absorbs quickly into the skin, creating an invisible protective barrier that helps prevent contaminants from penetrating the skin's surface. This makes hand cleansing easier at the end of a task while supporting good skin condition throughout the working day.

Being **unperfumed**, the cream is suitable for food preparation areas and fragrance-sensitive environments where scented products may be undesirable. Its skin-friendly formulation encourages regular use and helps support workplace skin care programmes.

Product Features

- **Unperfumed skin protection cream**
- Forms a protective barrier against workplace contaminants
- Fast-absorbing, non-greasy formulation
- Helps protect against dirt, oils, grease and detergents
- Suitable for frequent daily use
- Convenient **300ml dispenser bottle**

Product Benefits

- **Helps protect skin from workplace irritants and contaminants**
- **Supports healthy skin condition throughout the working day**
- **Makes hand cleaning easier after work tasks**
- Suitable for food handling and fragrance-sensitive environments
- Encourages regular use with a comfortable non-greasy feel
- Supports workplace skin care and health programmes
