Rentokil Wasp Destroyer Foam Aerosol - 300ml

Variant code: 06-PSW97

Rentokil Wasp Nest Destroyer Foam - 300ml is a **fast-acting insecticidal foam aerosol** designed to control wasps within clearly visible nests. Its powerful foam jet allows treatment from a distance of approximately two metres, helping users avoid approaching the nest unnecessarily. Suitable for accessible wasp nests in locations such as **lofts, sheds, garages and trees**, this ready-to-use treatment provides a practical solution for controlling unwanted wasp activity around homes and outbuildings.

The specialist formulation contains the insecticidal active ingredients **1R-trans phenothrin and tetramethrin**, which work together to control wasps within treated nests. When sprayed, the product releases a directed foam that coats the nest and helps deliver the insecticide to the affected area. The treatment is designed to be **effective within 24 hours**, although results depend on achieving adequate coverage and following the manufacturer's instructions. The foam application is particularly useful where the entire nest can be clearly identified and safely reached by the spray.

Supplied in a convenient **300ml aerosol can**, the product requires no dilution, mixing or additional spraying equipment. According to Rentokil, one can provides sufficient product to treat approximately three large nests, depending on nest size and the amount required for complete coverage. Designed for **amateur use in wasp nest control**, it offers a targeted treatment option for suitable visible nests. Where nests are particularly large, difficult to access or located in hazardous positions, professional pest control assistance is recommended.

Product Features

- **Fast-acting wasp nest treatment** designed to control wasps within clearly visible nests.
- **Directed foam jet** allows treatment from approximately two metres away.
- **Effective within 24 hours** when applied correctly under suitable conditions.
- **Dual insecticidal ingredients** contains 1R-

trans phenothrin and tetramethrin.
- **Foam-based application** helps coat the nest for targeted insecticide delivery.
- **Suitable for visible nests** including accessible nests in lofts, sheds, garages and trees.
- **Ready-to-use aerosol** requires no dilution or specialist spraying equipment.
- **Convenient 300ml can** provides sufficient product for multiple suitable treatments.
- **Indoor and outdoor applications** suitable for appropriate nest locations when used according to the label.
- **Targeted pest control** designed specifically for wasp nest treatment rather than general surface spraying.

Product Benefits

- **Effective nest control** helps eliminate wasps within treated nests.
- **Distance application** reduces the need to approach an active nest closely.
- **Fast treatment performance** provides control within 24 hours under suitable conditions.
- **Convenient foam coverage** helps direct insecticide onto the nest rather than surrounding areas.
- **Ready-to-use convenience** eliminates mixing, measuring and additional preparation.
- **Versatile nest treatment** suitable for accessible indoor and outdoor nest locations.
- **Practical household pest control** provides an option for treating manageable, clearly visible wasp nests.

Technical Characteristics

- **Brand:** Rentokil
- **Product Type:** Wasp Nest Destroyer Foam
- **Capacity:** 300ml
- **Product Format:** Ready-to-Use Aerosol
- **Dispensing Type:** Directed Foam Jet
- **Physical State:** Liquid
- **Appearance:** Colourless Liquid
- **Colour:** Colourless
- **Odour:** Characteristic
- **pH:** 7–9
- **Relative Density:** 0.9
- **Active Ingredients:** 1R-trans Phenothrin and Tetramethrin

- **Primary Function:** Wasp Nest Control
- **Target Pest:** Wasps
- **Application Distance:** Approximately 2 Metres
- **Treatment Performance:** Effective Within 24 Hours
- **Coverage:** Approximately 3 Large Nests per 300ml Can, Depending on Nest Size
- **Suitable Locations:** Accessible Nests in Lofts, Sheds, Garages and Trees
- **Dilution:** None Required
- **Hazard Classification:** Extremely Flammable Aerosol
- **Eye Hazard:** Causes Serious Eye Damage
- **Environmental Hazard:** Very Toxic to Aquatic Life with Long Lasting Effects
- **Intended Use:** Amateur Wasp Nest Control

Applications

Area of Use: Designed for treating **clearly visible wasp nests** in suitable locations around homes, gardens and outbuildings. Typical applications include accessible nests in **lofts, sheds, garages, trees and other sheltered areas** where the entire nest can be identified. The product should only be used where treatment can be carried out safely without climbing, entering confined spaces or approaching an active nest too closely.

How to Use: Read the product label carefully before treatment and ensure the nest is clearly visible. For suitable accessible nests, Rentokil recommends applying the product from a distance of approximately **two metres**. Shake the can as directed and spray the foam towards the nest, ensuring complete coverage in accordance with the label instructions. Treatment is generally recommended during the **early morning or late evening**, when more wasps are likely to be inside the nest. Keep a clear escape route and avoid standing directly beneath the nest. Do not disturb or remove the nest immediately after treatment.

Application Considerations: The product is intended for **visible wasp nests** and should not be used indiscriminately around suspected nesting areas. Do not attempt to treat concealed nests, nests requiring ladder access or nests positioned near electrical hazards. Large nests, particularly those exceeding approximately 50cm in diameter, may require professional treatment. Test nearby painted surfaces where practical, as the foam may cause discolouration. Avoid spraying plants, ponds, watercourses and areas where bees or

other non-target insects may be exposed. People with a history of severe reactions to wasp stings should not attempt nest treatment.

Safety: Danger. Extremely flammable aerosol. Pressurised container may burst if heated. The formulation **causes serious eye damage** and is **very toxic to aquatic life with long lasting effects**. Keep away from heat, sparks, open flames and other ignition sources. Do not smoke during application. Wear suitable protective clothing, gloves and eye protection, and take precautions against wasp stings. Avoid breathing concentrated spray and keep children and pets away from the treatment area. If the product enters the eyes, rinse cautiously with water and seek immediate medical attention. Do not pierce or burn the aerosol container, even after use. Protect from sunlight and temperatures exceeding **50°C**. Prevent contamination of drains, ponds and watercourses. Always use biocides safely and follow the product label.

Property	Value
