SAFETY DATA SHEET DEGREASER

According to Regulation (EC) No. 1272/2008 on Classification, Labelling and Packaging of Substances and Mixtures.

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name DEGREASER

Product number CCS3

UFI CODE: DAR4-U2Q3-6K5E-M2MY

1.2. Relevant identified uses of the substance or mixture and uses advised against

Uses advised against Not for direct contact with Food or Beverage stuffs. Not for oral consumption.

1.3. Details of the supplier of the safety data sheet

Supplier PVA HYGIENE

Unit 6, Havyat Business Park, Wrington, Bristol, BS40 5PA

01934 862 859 sales@pva-

hygiene.co.uk

1.4. Emergency telephone number

Emergency telephone 01934 862 859 (office hours) UK Environment Agency 24hour Advisory Service 0800 807060.

For UK Medical Emergency Advice Dial 111.

This product is registered with the UK NPIS service (access for medical Professionals only). This product is registered with the Irish National Poisons Centre Tel:+353 (01) 809 2166.

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture Classification (EC 1272/2008)

Physical hazards Not Classified

Health hazards Skin Irrit. 2 - H315 Eye Dam. 1 - H318

Environmental hazards Not Classified

2.2. Label elements

Hazard pictograms

Signal word Danger

Hazard statements H315 Causes skin

irritation.

H318 Causes serious

eye damage.

DEGREASER

Precautionary P102 Keep out of reach of children.

statements P264 Wash contaminated skin thoroughly

after handling.

P280 Wear eye protection.

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to

do. Continue rinsing.

P302+P352 IF ON SKIN: Wash with plenty of

water.

P301+P330+P331 IF SWALLOWED: Rinse

mouth. Do NOT induce vomiting.

P308+P313 IF exposed or concerned: Get

medical advice/ attention. P402 Store in a dry place.

P501 Dispose of contents/ container in accordance with national regulations.

Contains SODIUM DODECYL BENZENE SULPHONIC

ACID

Labelling notes WHEN DILUTED FOR NORMAL USE,

SOLUTIONS OF THIS PRODUCT HAVE NO HEALTH OR ENVIRONMENTAL HAZARDS

2.3. Other hazards

This product does not contain any substances classified as PBT or vPvB.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

SODIUM CARBONATE 60 - 80%

CAS number: 497-19-8 EC number: 207-838-8 REACH registration number:

012119485498-19-XXXX

Classification

Eye Irrit. 2 - H319

5 - 10%

SODIUM DODECYL BENZENE SULPHONIC ACID

CAS number: 25155-30-0

Classification

Acute Tox. 4 - H302 Skin Irrit. 2 - H315 Eye Dam. 1 - H318

Aquatic Chronic 3 - H412

1-5%

BETA-ALANINE, N-(2-CARBOXYETHYL)-, N-COCO ALKYL

DERIVS., DISODIUM SALTS

CAS number: 90170-43-7 EC number: 290-476-8 REACH registration number:

012119976233-35-XXXX

Classification

Eye Irrit. 2 - H319

The full text for all hazard statements is displayed in Section 16.

DEGREASER

Composition comments To the best of our knowledge, all of the substances used in this product are being supported

for the relevent application in REACH.

SECTION 4: First aid measures

4.1. Description of first aid measures

General information For immediate First Aid advice in the UK, dial 111. When it is safe to do so, remove victim

immediately from source of exposure. However, consideration should be given as to

whether moving the victim will cause further injury.

Inhalation Move affected person to fresh air. Get medical attention if any discomfort continues.

Ingestion Do not induce vomiting. Rinse mouth thoroughly with water. Get medical attention

immediately. Show this Safety Data Sheet to the medical personnel.

Skin contact Remove contaminated clothing and rinse skin thoroughly with water. Get medical attention if

irritation persists after washing.

Eye contact Remove any contact lenses and open eyelids wide apart. Promptly wash eyes with plenty of

water while lifting the eyelids. Continue to rinse for at least 15 minutes and get medical

attention.

4.2. Most important symptoms and effects, both acute and delayed

General information Neat product will cause skin irritation and potentially permanent eye damage. Dilute product

will result in less severe damage to the eyes, but contact should be treated as per neat

chemical.

Inhalation Unlikely route of exposure. Inhalation of sprayed droplets may result in soreness of the

throat, mouth and nose.

Ingestion Unlikely route of exposure without deliberate abuse. If neat chemical is ingested, irritation of

the mouth, throat and GI tract may occur. If dilute chemical is ingested some soreness of the

mouth, throat and GI tract may occur.

Skin contact Prolonged or repeated exposure may cause severe irritation.

Eye contact May result in permanent eye damage.

4.3. Indication of any immediate medical attention and special treatment needed

Notes for the doctor Rinse well with water to neutral pH. Contains High pH powder with wetting agents in a water

soluble PVA film. The film may swell before fully dissolving.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media The product is non-combustible. Use fire-extinguishing media suitable for the surrounding fire.

5.2. Special hazards arising from the substance or mixture

Specific hazards This product is non combustible, on heating corrosive vapours may be formed. PVA Film is

water soluble, consider use of Dry Powder or CO2 to prevent release of chemical powder

within the sachet.

5.3. Advice for firefighters

Protective actions during Protective clothing and respiratory protection should be worn when tackling fires involving this firefighting product. Control run-off water by containing and keeping it out of sewers and watercourses.

Special protective equipment Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective for firefighters clothing.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions Wear protective clothing as described in Section 8 of this safety data sheet. Ensure adequate

ventilation of the working area.

DEGREASER

6.2. Environmental precautions

Environmental precautions Spillages or uncontrolled discharges into watercourses must be reported immediately to the

Environmental Agency or other appropriate regulatory body. Avoid or minimise the creation of

any environmental contamination.

6.3. Methods and material for containment and cleaning up

Methods for cleaning up Collect and place in suitable labelled containers and seal securely. Collect powder using

special dust vacuum cleaner with particle filter or carefully sweep into suitable waste disposal

containers and seal securely. For waste disposal, see Section 13.

6.4. Reference to other sections

Reference to other sections See sections 8,12 & 13

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Usage precautions Wear protective clothing as described in Section 8 of this safety data sheet. Avoid contact with

skin and eyes. Ensure adequate ventilation of the working area.

7.2. Conditions for safe storage, including any incompatibilities

Storage precautions Keep container tightly closed and dry. Store between 0 and 30 Degrees C.

7.3. Specific end use(s)

Specific end use(s) Degreasing powder.

SECTION 8: Exposure controls/Personal protection

8.1. Control parameters Occupational exposure limits

SODIUM CARBONATE

Long-term exposure limit (8-hour TWA): 8 mg/m³

Ingredient comments

Where an exposure level is quoted, a risk assessment should consider if there is a need to monitor the atmosphere of the working environment. Results should be compared against the WEL and/or DNEL information provided. The Long Term WEL refers to total exposure of a worker to a specific substance averaged out over an 8 hour period.

The Short Term WEL refers to a single exposure of a worker to a specific substance over a 15 minute period.

If the Short Term WEL is exceeded and no Long Term Limit is set, further exposure during the working shift is not permitted. Further controls should be implemented to ensure that future exposure to the substance is reduced below the levels set before the activity is repeated/continued. Where no Short Term WEL exists, guidance from the HSE is to use a value of three times the Long Term WEL.

The WEL limits are laid down in the EH40 list as supplied by the HSE. Where a worker is exposed to levels approaching a limit, further exposure control measures should be considered to reduce exposure to the substance. DNEL and/or PNEC information is supplied by manufacturers of substances in accordance with REACH legislation (Regulation (EC) No 1907/2006), and is used to provide suitable risk reduction measures to limit exposure of the user of the substance to a non hazardous level. If the measured level of exposure by a route divided by the DNEL for the route is greater than 1, then further exposure controls should be implemented as described in section 8.2. Where new information becomes available under REACH, this will be passed on as revisions to the Safety Data Sheet.

Alanine, N,N-bis(carboxymethyl) - trisodium salt

DNEL Professional - Inhalation; Short term systemic effects: 40 mg/m³

Professional - Inhalation; Short term local effects: 40 mg/m³

Professional - Inhalation; Long term local effects: 4 mg/m³

DEGREASER

PNEC - Fresh water; 2 mg/l

STP; 100 mg/lSoil; 2.5 mg/kg

- marine water; 0.2 mg/l

- Intermittent release; 1 mg/l

8.2. Exposure controls

Protective equipment

Appropriate engineering controls

Personal protection

Provide adequate general and local exhaust ventilation.

The PPE indicated above is not a COSHH assessment. It represents PPE that should be considered during the manufacture, distribution, use and final disposal stages of this product's life cycle. It is the responsibility of employers to conduct a COSHH/risk assessment to determine appropriate PPE levels. The information given below should be used to support this assessment. Where possible replace manual processes with automated or closed

processes to minimise contact with the product.

Eye/face protection Wear approved, tight fitting safety glasses where splashing is probable. Refer to EN Standard

166 to select appropriate level of protection.

Hand protection Upon exposure to sachet contents: Wear protective gloves. Rubber (natural, latex). Neoprene.

Polyvinyl chloride (PVC). The expected use of this product is such that gloves with a breakthrough time of >60 minutes should be regarded as sufficient. Gloves should be

inspected regularly for damage and replaced when necessary.

Other skin and body

protection

Provide eyewash station. Wear suitable protective clothing as protection against splashing or

contamination.

Hygiene measures Promptly remove non-impervious clothing that has become contaminated, provided it is not

adhered to the skin. Wash contaminated clothing before reuse.

Respiratory protection
No specific recommendation made, but respiratory protection must be used if the general

level exceeds the Workplace Exposure Limit.

Environmental exposure

controls

Do not allow the substance to contaminate surface water/ground water. See points 6, 12 &13.

General Health and Safety

Measures.

Note:- In use solutions at recommended dilution are not classified, but a risk assessment to determine PPE should be conducted. We recommend use of gloves and eye protection for

normal use of this product.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance Powder
Colour Yellow
Odour Indistinct.

Gadai inaidiinoi

Not applicable.

pH Alkaline Powder. pH of

1% solution >11.

Melting point Not applicable.

Initial boiling point

Odour threshold

and range

Not applicable.

Flash point Not applicable.

DEGREASER

Evaporation rate Not applicable.

Evaporation factor Not applicable.

Flammability (solid, Not applicable.

gas)

Upper/lower

Not applicable.

flammability or explosive limits

Other flammability Not applicable.

Vapour pressure Not applicable.

Vapour density Not applicable.

Bulk density Not applicable.

Solubility(ies) Soluble in water.

Partition coefficient Not technically practical

for mixtures.

Auto-ignition

Not applicable.

temperature

Decomposition Not applicable.

Temperature

Viscosity Not determined.

Explosive properties Not applicable.

Explosive under the Not considered to be

influence of a flame explosive.

Oxidising properties Not applicable. Contains

o Oxidising

9.2. Other Components.

information

Particle size Not applicable.

Molecular weight Not applicable.

Volatility Not applicable.

Saturation Not applicable.

concentration

Critical temperature Not applicable.

Volatile organic

compound

Not applicable.

Explosive Not Classified as Properties Explosive

Storage 0 - 30 Degrees C

Temperature Range

SECTION 10: Stability and reactivity

10.1. Reactivity

Reactivity Not expected to react when correctly stored and used. Mixing with other chemicals may

produce unexpected reactions.

10.2. Chemical stability

Stability Stable at normal ambient temperatures and when used as recommended. - See note 10.6.

10.3. Possibility of hazardous reactions

Possibility of hazardous Refer to section 10.1. Do not mix with Hypochlorite based chemicals, this could result in a reactions dangerous heating of the solution.

10.4. Conditions to avoid

DEGREASER

Conditions to avoid Avoid excessive heat for prolonged periods of time. Do not store in damp areas.

10.5. Incompatible materials

Materials to avoid Strong acids. Hypochlorite based chemicals. Bleach. Soft metals such as Copper, Brass, Zinc

and Aluminium.

10.6. Hazardous decomposition products

Hazardous decomposition Does not decompose when used and stored as recommended. - See section 10.5. products

SECTION 11: Toxicological information

11.1. Information on toxicological effects Acute toxicity - oral

ATE oral (mg/kg) 5,000.0

Carcinogenicity

Carcinogenicity The components of this formulation will not be systemically available in the body under

normal conditions of handling. As a consequence it is not expected to cause cancer.

General information See section 4.2.

Inhalation Unlikely route of exposure. Inhalation of sprayed droplets may result in soreness of the throat,

mouth and nose. - See section 4.2.

Ingestion May cause irritation to mouth, throat and GI tract.

Skin contact There may be irritation and redness at the site of contact.

Eye contact May cause permanent eye injury.

SECTION 12: Ecological information

Ecotoxicity This product is not classified as environmentally hazardous. However, this does not exclude

the possibility that large or frequent spills can have a harmful or damaging effect on the

environment.

12.1. Toxicity Acute aquatic toxicity

Acute toxicity - fish Normal use of the diluted product is not expected to pose any risk.

12.2. Persistence and degradability

Persistence and degradability The surfactant(s) used in this preparation complies (comply) with the biodegradability criteria

as laid down in the European Detergents Regulation No 648/2004 as amended.

12.3. Bioaccumulative potential

Bioaccumulative potential Not expected to bioaccumulate.

Partition coefficient Not technically practical for mixtures.

12.4. Mobility in soil

Mobility The product contains substances which are water soluble and may spread in water systems.

12.5. Results of PBT and vPvB assessment

Results of PBT and vPvB

assessment

This product does not contain any substances classified as PBT or vPvB.

12.6. Other adverse effects

Other adverse effects Not determined.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

General information When handling waste, the safety precautions applying to handling of the product should be

considered. Disposal of this product, process solutions, residues and by-products should at all

DEGREASER

times comply with the requirements of environmental protection and waste disposal legislation

and any local authority requirements. Do not mix with other chemicals.

Disposal methods Small volumes of use solution can be disposed of to sewers.

SECTION 14: Transport information

General The product is not covered by international regulations on the transport of dangerous goods

(IMDG, IATA, ADR/RID).

14.1. UN number

Not applicable.

14.2. UN proper shipping name

Not applicable.

14.3. Transport hazard class(es)

No transport warning sign required.

14.4. Packing group

Not applicable.

14.5. Environmental hazards

Environmentally hazardous substance/marine pollutant

No.

14.6. Special precautions for user

Not applicable.

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and

the IBC Code

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU legislation European Regulation (EC) No 1272/2008 on Classification, Labelling and Packaging of

Substances and Mixtures.

This replaces Directive 67/548/EEC - Classification, Packaging and Labelling of Dangerous Substances and Regulation (EC) No. 453/2010 relating to the Classification, Packaging and Labelling of Dangerous Preparations. Also considered is the REACH Regulation (EC)

No.1907/2006.

15.2. Chemical safety assessment

Pcs Information

No chemical safety assessment has been carried out.

SECTION 16: Other information

DEGREASER

Abbreviations and acronyms used in the safety data sheet

(EC) No. 1272/2008: EU Regulation on Classification, Labelling and Packaging of Substances and Mixtures.

NPIS - National Poisons Information Service. vPvB - Very Persistent, Very bioaccumulative. PBT - Persistent, Bioaccumulative & Toxic.

REACH - Registration, Evaluation, Authorisation & restriction of CHemicals (Regulation EC

1907/2006).

DNEL - Derived No Effect Limit.

PNEC - Predicted No Effect Concentration.

COSHH - Control of Substances Hazardous to Health.

Industry - Refers in section 8 to application of the substance in an industrial process. Professional - Refers in section 8 to application/use of the preparation/product in a skilled

trade premises.

General information This document is a Safety Data Sheet, NOT a CoSHH assessment. It is the customer's

responsibility to conduct a full CoSHH assessment, taking into account the information held within this document along with other local factors considered in a risk assessment. The Risk and Hazard statements listed below are the full text of abbreviations used in this

document.

They are not the final classification, for this refer to section 2.

Revision comments Addition of Emergency Contact Details

Revision date 20/06/2020

Hazard statements in full H302 Harmful if swallowed.

H315 Causes skin irritation.

H318 Causes serious eye damage. H319 Causes serious eye irritation.

H412 Harmful to aquatic life with long lasting effects.

REACH extended MSDS

comments

REACH requires that persons handling chemicals should take the necessary risk

management measures, in accordance with assessments from manufacturers and importers of chemical substances. The relevent recommendations must be passed along the supply

chain. These assessments are generally reported in Exposure Scenarios.

Where Exposure Scenarios have been provided for substances used in this product, the

relevent information is incorporated into the safety data sheet.

END OF SAFETY DATA SHEET

This information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Such information is, to the best of the company's knowledge and belief, accurate and reliable as of the date indicated. However, no warranty guarantee or representation is made to its accuracy, reliability or completeness. It is the user's responsibility to satisfy himself as to the suitability of such information for his own particular use.
