

Compostable Liner – 10L – Roll of 26

Variant code: 18-VBL10

Compostable Bin Liners – 10 Litre – Roll of 26 | Eco-Friendly Waste Bags

Make a sustainable choice for your waste disposal with our premium Compostable Bin Liners. This roll contains 26 high-quality, 10-litre capacity liners, specifically designed for collecting organic waste and food scraps for composting.

Key Features & Benefits:

- **Certified Compostable:** Made from plant-based materials, these liners are fully **biodegradable** and **compostable** according to recognised standards (e.g., EN13432). When disposed of in your compost bin or through industrial composting facilities, they break down naturally, enriching the soil without leaving harmful residues.
- **Perfect 10 Litre Size:** Ideal for kitchen caddies, small bins, and food waste containers. Their 10-litre capacity strikes the perfect balance between practicality and manageability.
- **Strong and Durable:** Despite being compostable, these liners are designed to be surprisingly strong and tear-resistant, effectively containing your food waste without leaks or spills.
- **Convenient Roll of 26:** Each roll provides you with a generous supply of 26 liners, offering excellent value and reducing the frequency of repurchasing.
- **Eco-Friendly Alternative:** Switch from traditional plastic bin bags to these **eco-friendly waste bags** and significantly reduce your environmental impact. Contribute to a greener planet by choosing a sustainable solution for your household waste.
- **Breathable Material:** The breathable nature of the compostable material helps to reduce moisture build-up and unpleasant odours associated with decomposing food waste.
- **Easy to Use:** Simply place a liner in your 10-litre bin or caddy and dispose of your organic waste as usual. Once full, the

entire liner can be added to your compost bin.

- **Promote Healthy Soil:** By using compostable liners, you are actively participating in the creation of nutrient-rich compost that can be used to improve your garden and reduce the need for chemical fertilisers.

Ideal For:

- Kitchen food waste
- Fruit and vegetable peelings
- Tea bags and coffee grounds
- Eggshells
- Garden waste (small amounts)
- Compostable packaging scraps
