15m Microbore Hose with Female Connector & Hose-lock Connector

Variant code: 16-00113

15m Microbore Hose Assembly is a **professional-grade reinforced 6mm microbore hose** designed for use with water-fed pole and window cleaning systems. Manufactured to Streamline's high standards, this durable hose offers excellent flexibility, reliable water flow and outstanding abrasion resistance for demanding commercial cleaning applications.

Supplied complete with a **Female Connector and Hose-Lock Connector**, the hose is ready for immediate installation and use. The reinforced construction helps protect against wear and tear during daily operation, while maintaining flexibility for easy handling around buildings, vehicles and work areas.

Designed for both **hot and cold water use**, the hose provides dependable performance across a variety of cleaning conditions. Its lightweight design helps reduce operator fatigue while ensuring efficient water delivery to poles and cleaning equipment.

Product Features

- **15m reinforced microbore hose**
- **6mm hose diameter**
- Complete with Female Connector
- Complete with Hose-Lock Connector
- Excellent abrasion resistance
- Lightweight and flexible design
- Suitable for hot and cold water applications
- Ready-to-use hose assembly

Product Benefits

- **Provides reliable water flow and system performance**
- **Excellent resistance to abrasion and wear**
- **Lightweight design improves handling and manoeuvrability**
- Suitable for both hot and cold water use
- Reduces setup time with pre-fitted connectors

- Durable construction ensures long service life

Technical Characteristics

- Product Type: **Microbore Hose Assembly**
- Length: **15m**
- Hose Diameter: **6mm**
- Connectors Included: Female Connector and Hose-Lock Connector
- Construction: Reinforced hose design
- Water Compatibility: **Hot and cold water**
- Abrasion Resistant: Yes

Applications

15m Microbore Hose Assembly is ideal for **window cleaning professionals, facilities maintenance teams, contract cleaners and commercial cleaning operators**. Suitable for use with **water-fed poles, purification systems and professional cleaning equipment**, it provides a reliable and durable water delivery solution for high-reach cleaning, window cleaning and exterior maintenance applications.

Property	Value
Length	15m
Area of Use	Water-Fed Pole Systems, Window Cleaning, Exterior Cleaning, Commercial Cleaning, Hose Connections.
How to Use	Connect the Q21 female coupling and AHA-H6 adaptor to compatible fittings, attach between the water source and water-fed pole, and use for hot or cold water cleaning applications
Diameter (mm)	6
Product Type	Microbore Hose Assembly
