Microfibre Carpet Bonnet - 17"

Variant code: 03-RR5002

Microfibre Carpet Bonnet is a **professional carpet cleaning and maintenance pad** designed to remove surface dirt and refresh the appearance of low-profile carpets and carpet tiles. Its microfibre construction provides effective cleaning while supporting an economical, low-moisture carpet maintenance system.

Ideal for **skimming low-profile carpeting and carpet tiles**, the bonnet helps lift surface soiling and maintain a clean, presentable appearance. Bonnet cleaning is an industry-recognised method of carpet maintenance, offering a **cost-effective solution with quick drying times** compared with more intensive wet cleaning methods.

Designed for use with compatible **17-inch rotary floor cleaning machines**, the bonnet provides efficient coverage for routine carpet maintenance. Its microfibre material helps collect dirt during cleaning, making it a practical choice for commercial environments where maintaining carpet appearance and minimising downtime are important.

Product Features

- **Microfibre construction** for effective carpet cleaning
- **17-inch diameter** for compatible rotary machines
- Ideal for skimming low-profile carpets and carpet tiles
- Designed for low-moisture carpet maintenance
- Helps remove surface dirt and light soiling
- Supports **quick drying times**
- Suitable for regular commercial carpet maintenance
- Cost-effective alternative to frequent intensive carpet cleaning

Product Benefits

- Helps maintain a clean and professional carpet appearance
- Reduces drying time and disruption to occupied areas
- Provides an economical carpet
