38mm High Reach Vacuum Cleaner Kit Friction Fit - 14' Reach Complete with Hose

Variant code: 16-HLVK2

38mm High Reach Vacuum Cleaner Kit Friction Fit is a lightweight, professional vacuum cleaning solution designed for safely removing dust and debris from elevated surfaces. Offering a **working reach of approximately 14 feet**, this friction-fit kit is ideal for cleaning **window sills, ledges, shelves, beams and other high-level areas** while allowing operators to work safely from floor level. Compatible with **any 38mm commercial vacuum cleaner**, it provides a practical and cost-effective solution for routine high-level dust removal.

Constructed from lightweight aluminium, the extending tubes provide excellent reach without adding unnecessary weight, helping reduce operator fatigue during prolonged cleaning. The supplied curved adaptor improves access to awkward areas, while the small dusting brush enables effective removal of dust from delicate surfaces. The friction-fit design allows components to assemble quickly and easily; however, the extension tubes are designed to fit together without interlocking.

Complete with a vacuum hose, this ready-to-use kit offers commercial cleaners an efficient way to maintain cleaner environments without the need for specialist access equipment in many everyday cleaning tasks.

Product Features

- Provides approximately 14ft (4.3m) working reach
- Compatible with all 38mm vacuum cleaners
- Lightweight aluminium extending tubes
- Friction-fit connection system
- Supplied complete with vacuum hose
- Curved adaptor for improved overhead access
- Small dusting brush for detailed cleaning
- Quick and simple assembly

Product Benefits

- **Allows high-level cleaning from floor**
