38mm High Reach Vacuum Kit - 21' Reach Complete with Hose

Variant code: 16-HLVK3

38mm High Reach Vacuum Kit is a professional high-level vacuum cleaning system designed to safely remove dust and debris from elevated surfaces using a standard **38mm vacuum system**. Offering a working reach of approximately **21 feet**, the kit enables operators to clean walls, ledges, pipework, ducting and other overhead areas while remaining safely at floor level, helping reduce reliance on ladders during routine cleaning. Designed for commercial environments, the system combines durability, compatibility and ease of use for facilities management and contract cleaning professionals.

The kit features **locking extension tubes** for improved stability during use, along with **130° and 45° angled ABS extension wands** that make it easier to position cleaning tools around ceilings, high walls and awkward overhead areas. Two **Sidewinder dusting brushes** provide excellent surface coverage for efficient dust removal, while the supplied **2.5m 38mm vacuum hose**, steel hose cuff adaptor and swivel cuff allow smooth integration with most Numatic commercial vacuum cleaners fitted with a 32/38mm hose connection.

Supplied as a complete ready-to-use package, the AUK Hygiene High Reach Vacuum Kit offers a practical and efficient solution for routine high-level dust control. Its lightweight, modular design improves operator safety and productivity while helping maintain cleaner indoor environments across a wide range of commercial facilities.

Product Features

- Provides approximately 21ft (6.4m) working reach for high-level cleaning
- Compatible with standard 38mm vacuum systems
- Designed to work with most Numatic commercial vacuum cleaners
- Three locking extension tubes for secure reach and stability
- 130° and 45° angled ABS extension wands for improved overhead access

- Includes 8" and 18" Sidewinder dusting brushes
- Supplied with 2.5m vacuum hose, steel hose cuff adaptor and 38mm swivel cuff
- Complete kit supplied ready for professional high-level cleaning

Product Benefits

- **Allows high-level cleaning while operators remain safely on the ground**
- **Improves access to pipework, ducting, ledges, beams and high walls**
- **Locking tube system provides greater stability during operation**
- Reduces reliance on ladders for routine maintenance cleaning
- Interchangeable extensions and brushes increase cleaning versatility
- Swivel cuff improves hose movement and reduces twisting
- Compatible with widely used commercial Numatic vacuum equipment
- Helps maintain cleaner, healthier commercial environments through effective overhead dust removal

Technical Characteristics

- Product Type: High Reach Vacuum Cleaning Kit
- Working Reach: Approximately 21ft (6.4m)
- Vacuum System Compatibility: 38mm
- Compatible Machines: Most Numatic Commercial Vacuum Cleaners with 32/38mm Hose Connection
- Extension Tubes: 3 × Locking Extending Tubes
- Extension Wands: 24" 130° ABS Extension & 18" 45° ABS Extension
- Dusting Brushes: 8" & 18" Sidewinder Dusting Brushes
- Included Components: Steel Hose Cuff Adapter, 38mm Swivel Cuff & 2.5m 38mm Vacuum Hose

Applications

The **38mm High Reach Vacuum Kit** is ideal for **commercial cleaning contractors, facilities management companies, schools, healthcare facilities, offices, warehouses, retail environments and public buildings**. Designed for routine removal of dust from **high walls, ventilation ducting, exposed pipework, lighting fixtures, beams, window ledges and overhead**
