Aeroflow Tap Suitable for Windmill Refill Gleam Plus and Luxury Foam Soap - For use with 5L/10L Windmill Refill Containers

Variant code: 14-711

Windmill Refill Aeroflow Tap is a dispensing accessory designed to provide **controlled and efficient decanting** of cleaning liquids from large containers. Developed for use with Windmill Refill systems, it ensures easy and accurate transfer of product into smaller containers.

This tap features a simple **on/off flow control mechanism**, allowing users to decant liquids directly into trigger spray bottles or other containers without unnecessary spillage. It is particularly useful for **neat product dispensing**, removing the need for dilution during transfer.

The Aeroflow Tap is compatible with **5L and 10L Windmill Refill containers**, including products such as Gleam Plus and Luxury Foam Soap. Its secure fit ensures reliable operation and ease of use in professional environments.

Please note, this tap is **not suitable for refilling 1L Recharger bottles**, for which an alternative dosing solution is required. Its durable construction and simple functionality make it ideal for high-use environments requiring efficient product handling.

Product Features

- **On/off dispensing tap** for controlled liquid flow
- Compatible with **5L and 10L Windmill Refill containers**
- Suitable for **direct decanting without dilution**
- Easy to install and operate
- Durable construction for repeated use
- Designed for professional cleaning systems

Product Benefits

- Improves efficiency when transferring liquids
- Reduces spillage and product waste
