Aerosol Solutions Stainless Steel Cleaner - 500ml

Variant code: 06-0503

Aerosol Solutions Stainless Steel Cleaner & Polish - 500ml is a specialist cleaning and polishing aerosol formulated to remove fingerprints, smudges and everyday surface marks from stainless steel. Its carefully blended cleaning and polishing agents help restore a clean, attractive finish while leaving behind a **temporary protective film** that reduces the adhesion of food deposits and grease splatter. Designed for convenient application, this professional stainless steel cleaner is ideal for maintaining the appearance of compatible metal surfaces in commercial and domestic environments.

The **dual-action cleaning and polishing formulation** works to remove visible marks while enhancing the appearance of stainless steel surfaces. Once applied and polished, the product leaves a temporary protective layer that helps prevent grease and food splashes from adhering as readily to the treated surface. This makes subsequent routine cleaning easier and helps maintain a neat, polished appearance in busy environments where stainless steel equipment is frequently handled.

Supplied in a convenient **500ml ready-to-use aerosol can**, the cleaner requires no dilution or additional dispensing equipment. It is particularly suitable for **commercial kitchens, catering facilities, hospitality venues, offices and general maintenance applications**. Its easy-to-apply and easy-to-remove formulation provides a practical solution for regular stainless steel care, helping cleaning and housekeeping teams maintain attractive surfaces with minimal effort.

Product Features

- **Specialist stainless steel cleaner** formulated to clean and polish compatible stainless steel surfaces.
- **Dual-action formulation** combines effective cleaning with surface polishing.
- **Removes fingerprints and smudges** helps restore a clean and presentable finish.
- **Temporary protective film** helps reduce the adhesion of food and grease splatter.

- **Easy-to-apply aerosol** provides convenient product application during routine cleaning.
- **Easy polishing and removal** allows the product to be buffed to an attractive finish.
- **Helps simplify subsequent cleaning** by reducing the tendency of grease deposits to adhere to treated surfaces.
- **Ready-to-use formulation** requires no dilution or mixing.
- **Professional cleaning applications** suitable for commercial kitchens, hospitality and maintenance environments.
- **500ml aerosol can** provides a convenient format for regular stainless steel maintenance.

Product Benefits

- **Improved surface appearance** helps stainless steel retain a clean, polished and professional finish.
- **Effective fingerprint removal** reduces visible handling marks on frequently touched surfaces.
- **Temporary surface protection** helps prevent food and grease splatter from adhering as readily.
- **Reduced cleaning effort** supports easier removal of subsequent surface deposits.
- **Convenient everyday maintenance** combines cleaning and polishing into a single application.
- **Versatile commercial use** suitable for maintaining compatible stainless steel equipment and fittings.
- **Ready-to-use convenience** eliminates the need for measuring, mixing or additional cleaning solutions.

Technical Characteristics

- **Brand:** Aerosol Solutions
- **Product Type:** Stainless Steel Cleaner and Polish
- **Capacity:** 500ml
- **Product Format:** Ready-to-Use Aerosol
- **Formulation:** Blend of Cleaning and Polishing Agents
- **Primary Function:** Cleaning, Polishing and Temporary Surface Protection
- **Target Surface:** Compatible Stainless Steel
- **Suitable Contamination:** Fingerprints,

Smudges and Everyday Surface Marks
- **Protective Action:** Temporary Film Helps Reduce Food and Grease Adhesion
- **Finish:** Clean, Polished Appearance
- **Application Method:** Aerosol Spray and Buffing
- **Dilution:** None Required
- **Application Frequency:** As Required for Routine Maintenance
- **Suitable Environments:** Commercial Kitchens, Catering Facilities, Hospitality Premises and General Maintenance Areas
- **Intended Use:** Professional and Domestic Stainless Steel Care
- **Packaging:** Pressurised Aerosol Can

Applications

Area of Use: Ideal for maintaining **stainless steel surfaces in commercial kitchens, restaurants, hotels, catering facilities, offices and domestic environments**. Suitable for compatible stainless steel appliance exteriors, cabinet fronts, splashbacks, extractor hoods, panels and other decorative metal surfaces. Particularly useful on frequently handled areas where fingerprints and smudges can affect the appearance of equipment and fittings.

How to Use: Ensure the surface is suitable for treatment and free from heavy loose debris. Shake the aerosol can if directed by the product label. Apply a controlled amount of **stainless steel cleaner and polish** to the surface or a clean, soft cloth, following the manufacturer's instructions. Spread evenly across the stainless steel, working with the direction of the grain where applicable. Use a clean, dry, lint-free cloth to polish and buff the treated area until the desired finish is achieved. Repeat when necessary to maintain the appearance of frequently used surfaces.

Application Considerations: Designed for **cleaning and polishing compatible stainless steel surfaces** rather than removing heavy burnt-on deposits or disinfecting equipment. Always test on a small, inconspicuous area before widespread application, particularly on coated, brushed or specially finished metals. Avoid excessive product application, which may leave unwanted deposits. Do not use on food-contact surfaces unless specifically permitted by the product label and followed by any required cleaning or rinsing. The protective film is temporary and may need to be renewed through routine maintenance.

Safety: This product is supplied in a **pressurised aerosol container**. Keep away from heat, sparks, open flames and other ignition sources, and follow the flammability warnings on the product label. Do not spray onto hot equipment, naked flames or electrical components. Use in a well-ventilated area and avoid breathing concentrated spray mist. Wear appropriate protective equipment where required by the workplace risk assessment. Do not pierce or burn the container, even after use. Protect from direct sunlight and temperatures exceeding **50°C**. Keep out of reach of children and store securely away from food and animal feed. Always follow the product label and relevant workplace safety procedures.
