Bio Productions Bio Blocks Urinal Blocks - 1.1kg

Variant code: 05-503

The **Bio Productions Bio Blocks Biological Urinal Blocks** are specially formulated to **reduce unpleasant odours and prevent blockages** in urinals, traps and pipework. Combining beneficial bacterial cultures with biological and enzymatic cleaning action, these water-soluble blocks help break down the organic deposits responsible for persistent washroom odours and drainage problems.

The advanced formulation contains **non-pathogenic bacteria and enzymes** that help break down **fats, uric scale and solid waste deposits** accumulating in urinal traps and pipes. As the blocks dissolve, they release active cleaning agents and a **fresh citrus fragrance**, helping maintain cleaner pipework and address odours at their source. Suitable for **stainless steel, porcelain and ceramic urinals**, Bio Blocks offer a practical biological approach to washroom maintenance.

Designed to help reduce the need for **constant flushing and frequent cleaning**, Bio Blocks can contribute to savings on water consumption and washroom maintenance costs. The **biodegradable, pDCB-free formulation** is suitable for conventional and waterless urinal systems. Supplied in a **1.1kg tub containing approximately 50 blocks**, they can also be used alongside **Bio Productions Blu-Away** for a more comprehensive washroom cleaning and odour-control programme.

Product Features

- **Biological urinal blocks** formulated to reduce odours and blockages
- Contains **beneficial, non-pathogenic bacterial cultures**
- Uses **biological and enzymatic cleaning action** to break down organic deposits
- Helps remove **fats, uric scale and solid waste** from urinal traps and pipework
- Targets the **source of unpleasant urinal odours**
- Features a **fresh citrus fragrance** for

improved washroom freshness
- **Water-soluble formulation** gradually releases cleaning agents
- **Biodegradable** formulation
- Free from **pDCB (paradichlorobenzene)**
- Suitable for **stainless steel, porcelain and ceramic urinals**
- Compatible with **conventional and waterless urinal systems**
- Helps reduce the need for **frequent flushing and maintenance**
- Suitable for use in **urinals and trough urinals**
- Can be used alongside **Blu-Away Washroom Cleaner and Odour Neutraliser**
- Supplied in a **1.1kg tub containing approximately 50 blocks**

Product Benefits

- **Biological and enzymatic cleaning action helps break down uric scale, fats and solids that cause odours and blockages**
- **Beneficial bacterial cultures help maintain cleaner urinal traps and pipework by targeting organic waste deposits**
- **Water-saving formulation helps reduce the need for constant flushing, potentially lowering washroom water bills**
- **Fresh citrus fragrance** helps maintain a pleasant washroom environment
- Regular use helps **prevent the accumulation of deposits** that can restrict drainage
- **Biodegradable, pDCB-free formulation** provides an alternative to traditional chemical urinal blocks
- Compatible with a range of **urinal materials and waterless systems**
- Helps reduce **routine maintenance requirements and associated cleaning costs**
- **Approximately 50 blocks per tub** provides a practical supply for commercial washroom maintenance
- Can be combined with **Blu-Away** to support a complete washroom cleaning and odour-control routine

Technical Characteristics

- **Product Type:** Biological Urinal Blocks

Tel: 01626 355177
Email: info@aukhygiene.com

- **Product Range:** Bio Blocks
- **Formulation:** Biological and Enzymatic
- **Active Components:** Non-Pathogenic Bacterial Cultures, Enzymes, Cleaning and Water-Softening Agents
- **Fragrance:** Citrus
- **Solubility:** Water Soluble
- **Biodegradable:** Yes
- **pDCB-Free:** Yes
- **Primary Function:** Urinal Cleaning, Odour Control and Blockage Prevention
- **Target Deposits:** Fats, Uric Scale and Organic Solids
- **Suitable Materials:** Stainless Steel, Porcelain and Ceramic
- **Suitable Urinal Types:** Conventional Urinals, Trough Urinals and Waterless Urinal Systems
- **Individual Block Weight:** Approximately 22g
- **Pack Size:** 1.1kg Tub
- **Approximate Quantity:** 50 Blocks per Tub
- **Recommended Application:** 1 Block per Urinal
- **Trough Urinal Application:** Space Blocks Approximately 50cm Apart
- **Replacement:** Replace When Fully Dissolved
- **Recommended Complementary Product:** Bio Productions Blu-Away

Applications

The **Bio Productions Bio Blocks Biological Urinal Blocks - 1.1kg** are designed for regular urinal cleaning, **odour control and blockage prevention** in commercial and public washrooms. Suitable for **hotels, pubs, clubs, restaurants, schools, offices and public buildings**, they help maintain cleaner urinal traps and pipework while supporting reduced water consumption. Place **one block in each urinal**, or position blocks approximately **50cm apart in trough urinals**, replacing them when dissolved. For a comprehensive washroom maintenance programme, use in conjunction with **Bio Productions Blu-Away Washroom Cleaner and Odour Neutraliser** to help maintain a clean, fresh and odour-free environment.
