Bio-P Urinal Cap - Disposable Urinal Deodoriser - Each

Variant code: 05-105

The patented Bio-P Urinal Cap has been designed to offer the most effective cleaning efficacy to consumers who don't wish to see urinal blocks. TIt has been designed to fit all urinals, including those that have been changed to accommodate 'waterless' or'water-saving systems, leaving large openings and no 'grid' in the urinal.

Until now only the Urinal Screen and Bio-block could prevent detritus and urinal blocks disappearing down the hole left by fitting these systems, but the Bio-P Urinal Cap has an adaptor which offers a simple and effective solution and fits all new and altered urinals.

The Bio-P Urinal Cap has a specially designed 'spear' to lock it into trap, securing it until the next service interval. Each Bio-P Urinal Cap comes complete with either a Bio-Productions Bio Block formulated to last either 4 – 6 weeks. The Bio-P Urinal Cap has holes on the upper surface to allow urine & the flush to wash over the Bio Block and take the chemical and biological cleaning agents into the trap and urinal pipes. And the rim of the Bio-P Urinal Cap is designed to prevent chewing-gum or other detritus entering the trap and causing blockages.
