Bio Productions Blu Away Biological Washroom Cleaner and Odour Neutraliser - 6 x 750ml

Variant code: 05-BA750

Blu Away is a **biological washroom cleaner and odour neutraliser** specially formulated to remove organic staining, urine contamination and unpleasant odours from washroom surfaces. Designed for professional washroom maintenance, it helps clean **toilets, urinals, ceramic surfaces, floors and walls**, targeting the organic deposits responsible for persistent urine-related odours and soiling.

The specialist biological formulation contains **beneficial microorganisms and bacteria** that naturally produce enzymes to help break down organic matter. These microorganisms, described as **probiotic bacteria**, support the biological degradation of urine residues and other organic contamination. The cleaner also helps control **uric scale build-up**, providing a practical solution for maintaining cleaner washroom floors, sanitary fittings and surrounding surfaces.

Suitable for **spray-and-wipe cleaning of ceramic surfaces** and diluted application to washroom floors, it offers a versatile approach to routine washroom hygiene. Simply spray and wipe suitable ceramic surfaces to control scale and soiling, or dilute and swab floors to help remove urine deposits and uric scale. For comprehensive biological washroom maintenance, use alongside **Bio Productions Bio Blocks** to help maintain clean, odour-free facilities.

Product Features

- **Biological washroom cleaner** for professional cleaning and maintenance
- **Odour-neutralising action** targets unpleasant smells associated with urine contamination
- **Beneficial bacteria formulation** supports the biological breakdown of organic matter
- **Enzyme-producing microorganisms** help degrade organic deposits
- **Probiotic biological technology** supports ongoing organic waste

breakdown
- **Organic stain removal** helps tackle urine-related soiling
- **Uric scale control** helps reduce deposits on suitable washroom surfaces
- **Suitable for ceramic surfaces** using a spray-and-wipe application
- **Suitable for washroom floors** when diluted according to instructions
- **Wall cleaning applications** help address urine contamination around sanitary fittings
- **Versatile cleaning formulation** for multiple washroom surfaces
- **Spray-and-wipe application** provides convenient routine cleaning
- **Dilutable formulation** supports floor swabbing and maintenance
- **Compatible with Bio Productions Bio Blocks** as part of a washroom maintenance programme
- **Professional biological cleaning solution** for frequently used washrooms

Product Benefits

- **Effective odour control** helps address the organic contamination responsible for persistent urine smells
- **Biological cleaning action** supports the breakdown of organic residues
- **Reduced urine staining** helps maintain cleaner washroom surfaces
- **Uric scale removal** supports regular maintenance of floors and sanitary areas
- **Cleaner ceramic surfaces** help maintain the appearance of toilets and urinals
- **Improved washroom freshness** supports a more pleasant environment for users
- **Versatile application methods** allow use for both surface cleaning and floor maintenance
- **Enzyme-producing bacteria** provide a biological approach to organic soil removal
- **Routine maintenance support** helps prevent persistent organic soiling from accumulating
- **Complementary Bio Blocks use** supports a coordinated biological washroom cleaning programme
- **Suitable for professional facilities** requiring regular washroom cleaning and odour management

Technical Characteristics

Tel: 01626 355177
Email: info@aukhygiene.com

- **Brand:** Bio Productions
- **Product Name:** Blu Away
- **Product Type:** Biological Washroom Cleaner and Odour Neutraliser
- **Physical Form:** Liquid
- **Cleaning Technology:** Biological Cleaning Using Beneficial Microorganisms
- **Biological Action:** Enzyme-Assisted Breakdown of Organic Matter
- **Microorganism Type:** Bacteria of Types Commonly Found in Soil and the Digestive Tract
- **Biological Classification:** Probiotic Microorganisms, as Described by the Manufacturer
- **Primary Application:** Washroom Surface Cleaning and Odour Control
- **Additional Application:** Uric Scale and Urine Soiling Removal
- **Target Soiling:** Organic Stains, Urine Deposits and Uric Scale
- **Odour Control:** Targets Odour Problems Associated with Organic Contamination
- **Suitable Surfaces:** Compatible Ceramic Surfaces, Washroom Floors and Walls
- **Ceramic Surface Application:** Spray and Wipe
- **Floor Cleaning Application:** Dilute and Swab
- **Dilution Ratio:** Follow the Manufacturer's Usage Guide
- **Complementary Product:** Bio Productions Bio Blocks
- **Available Container Sizes:** 750ml and 5L
- **pH:** Not Specified on the Manufacturer's Product Page
- **Colour:** Not Specified on the Manufacturer's Product Page
- **Intended Use:** Professional Washroom Cleaning and Maintenance
- **Suitable Environments:** Commercial, Public and Institutional Washrooms
- **Storage:** Follow the Manufacturer's Product Label and Safety Data Sheet
- **Safety:** Refer to the Current Safety Data Sheet Before Use
- **Precaution:** Use Only as Directed and Check Surface Compatibility Before Application

Applications

Ideal for **biological washroom cleaning, urine odour neutralisation, organic stain removal and uric scale control** on suitable ceramic surfaces, floors and walls. Suitable for **public toilets, offices,**
