Bio Productions Insecticide - 750ml

Variant code: 09-408

Insecticide is professional strength product.

Our easy to use aqueous insecticide provides long lasting control of all types of flying and crawling insects including bedbugs, fleas, flies, ants, beetles, mites, cockroaches, mosquitoes, wasps and moths.

Insecticide's triple action formula contains both synthetic and natural pyrethroids for fast knock-down and kill and also includes an insect growth regulator, which interrupts the insect's development, halting and preventing reproduction in difficult to control populations.

Insecticide has no solvent smell, making it ideal for the control of a multitude of pests in and around the home and for public hygiene areas such as offices, industrial premises, hospitals (not occupied wards), museums, aircraft, ships and military installations.

HSE no.10793 approved insecticide for control and extermination of crawling and flying insects.

Not to be used on pet bedding, pet sleeping quarters or where pets frequently lie.

Features:

- Low odour during and after use
- Strong and long lasting
- Full strength ready to use product
- Bio Productions Insecticide is normally non-staining, but a patch test should always be made first

Available in 5L refill and 750ml trigger spray bottles.
