Bio Productions Royal Flush Cistern Blocks - Tub of 24

Variant code: 05-506

Bio Productions Royal Flush Biological Cistern Blocks are **professional toilet cleaning and deodorising blocks** designed to deliver both biological and chemical cleaning agents with every flush. Unlike conventional decorative blue cistern blocks, they combine **toilet bowl cleaning, odour control and biological pipework maintenance** to help keep toilets and associated drainage systems clean and fresh.

The advanced formulation contains **water-softening and sequestering agents** to help maintain a clean toilet bowl and control mineral deposits. Its **beneficial microorganisms** produce enzymes that assist in breaking down organic matter within the pipework, helping to prevent the accumulation of solids. The biological action is particularly useful in **small-bore pipework, pumped toilet systems and older buildings** where drainage can be problematic.

Designed for **toilet cistern use**, each block releases cleaning agents and a distinctive **blue colour** when the toilet is flushed, helping clean, deodorise and freshen the bowl. The biological formulation also helps support **septic tank efficiency** by encouraging the breakdown of organic waste. Supplied in a **tub of 24 blocks**, it provides a convenient solution for ongoing toilet and drainage maintenance in commercial and domestic washrooms.

Product Features

- **Biological cistern blocks** for toilet cleaning and drainage maintenance
- **Dual-action formulation** combines biological and chemical cleaning agents
- **Blue water colouring** released with each flush
- **Toilet bowl cleaning action** helps maintain clean sanitary surfaces
- **Deodorising performance** helps control unpleasant toilet odours
- **Water-softening agents** help reduce mineral deposits
- **Sequestering agents** support effective bowl cleaning
- **Beneficial bacteria** help break down

organic waste
- **Enzyme-producing microorganisms** support biological cleaning in pipework
- **Organic solids control** helps reduce waste accumulation
- **Suitable for small-bore drainage systems**
- **Suitable for pumped toilet systems**
- **Useful for older buildings** with problematic drainage runs
- **Supports septic tank efficiency** through biological activity
- **Convenient cistern application** for routine toilet maintenance
- **Supplied in a tub of 24 blocks**

Product Benefits

- **Continuous toilet cleaning** delivers cleaning agents with each flush
- **Improved toilet freshness** helps maintain a more pleasant washroom environment
- **Biological waste breakdown** helps control organic deposits within pipework
- **Reduced solids accumulation** supports trouble-free drainage maintenance
- **Limescale control** helps maintain cleaner toilet bowls
- **Blue water colouring** provides a visible indication of product activity
- **Support for small-bore systems** makes it useful where drainage capacity is limited
- **Suitable for pumped toilets** requiring ongoing organic waste management
- **Septic tank support** helps maintain biological waste treatment processes
- **Combined cleaning functions** address bowl cleanliness and pipework maintenance
- **Simple maintenance routine** allows blocks to be replenished as required
- **Bulk tub packaging** provides a practical supply for multiple washrooms

Technical Characteristics

- **Brand:** Bio Productions
- **Product Range:** Royal Flush
- **Product Name:** Royal Flush Biological Cistern Blocks
- **Product Type:** Biological Toilet Cistern Cleaning Blocks
- **Physical Form:** Solid Blocks
- **Water Colour:** Blue

Tel: 01626 355177
Email: info@aukhygiene.com

- **Cleaning Technology:** Combined Biological and Chemical Action
- **Biological Ingredients:** Beneficial Microorganisms
- **Biological Mechanism:** Enzyme-Assisted Organic Matter Breakdown
- **Water Treatment Agents:** Water-Softening and Sequestering Agents
- **Primary Application:** Toilet Bowl Cleaning and Deodorising
- **Secondary Application:** Biological Pipework Maintenance
- **Target Deposits:** Organic Solids and Mineral Deposits
- **Odour Control:** Toilet Bowl Deodorising
- **Application Location:** Toilet Cistern
- **Activation Method:** Toilet Flushing
- **Suitable Drainage Systems:** Conventional, Small-Bore and Pumped Toilet Systems
- **Older Building Applications:** Suitable for Drainage Systems Prone to Organic Build-Up
- **Septic Tank Compatibility:** Designed to Support Septic Tank Efficiency
- **Pack Format:** Tub
- **Pack Quantity:** 24 Blocks
- **Intended Use:** Routine Toilet and Drainage Maintenance
- **Storage:** Follow the Manufacturer's Product Label and Safety Data Sheet
- **Safety:** Handle According to the Current Product Safety Instructions
- **Precaution:** Use Only as Directed and Keep Out of Reach of Children
- **Quantity:** Tub of 24

Applications

Ideal for **toilet cistern cleaning, toilet bowl deodorising, organic waste breakdown and drainage maintenance** in commercial and domestic washrooms. Particularly suitable for **offices, hotels, schools, restaurants, public toilets, older buildings, pumped toilet systems and properties with septic tanks** requiring ongoing biological toilet maintenance.

Property	Value
Fragrance	Lemon
pH	8
Dilution	Replace block when colour of water fades

Tel: 01626 355177
Email: info@aukhygiene.com

Property	Value
Area of Use	Toilet cisterns
CLP	corrosive
How to Use	Close toilet bowl cover, remove the cistern lid. Flush toilet to empty the tank. Place block, including soluble wrapper, into tank away from water inlet. Replace cistern lid. When colour of flush water fades add new block for continuous cleaning.
Chemical Colour	Blue
Pack Size	Tub of 24
