Bourne Traffic Liquid Wax - 5L

Variant code: 03-239

Bourne Traffic Liquid Wax is a **professional solvent-based wax floor polish** designed for the traditional cleaning, protection and maintenance of sealed wood, cork, composite block and terracotta floors. Its specialist blend of solvents and waxes helps restore the natural appearance of flooring while delivering a durable, long-lasting shine.

Combining **floor cleaning and protection in one application**, the heavy-duty formulation helps remove ingrained dirt while depositing a protective sacrificial wax layer. This helps reduce everyday wear, maintain floor appearance and revitalise older or worn surfaces, making it an effective solution for professional floor maintenance.

Designed for use on **previously sealed floors**, ideally those treated with Bourne Seal, the liquid wax can be buffed using a compatible rotary floor machine to develop a polished, high-gloss finish. Supplied in a **5L container**, it provides a practical maintenance solution for commercial and specialist flooring environments.

Product Features

- **Solvent-based liquid wax polish** for traditional floor maintenance
- Specialist blend of natural and synthetic waxes
- Suitable for sealed wood, cork, composite block and terracotta floors
- **Dual-action formulation** cleans and protects in one application
- Helps remove ingrained dirt and surface soiling
- Creates a protective sacrificial wax layer
- **Fully buffable** for a high-gloss finish
- Ideal for revitalising older or worn floors
- Supplied in a **5L container**
- For professional use only

Product Benefits

- Enhances the natural beauty and appearance of traditional flooring
- Combines cleaning and polishing to reduce maintenance time

- Helps protect sealed floors against everyday wear and scuffing
- Builds a **long-lasting, professional shine**
- Regular buffing helps restore gloss and remove light scuff marks
- Helps extend the service life of maintained floor finishes
- Allows worn areas to be re-treated without completely refinishing the floor
- Suitable for regular maintenance in commercial and high-traffic environments

Technical Characteristics

- **Product type:** Solvent-based liquid floor wax
- **Pack size:** 5L
- **Formulation:** Blend of carnauba and synthetic waxes in solvents
- **Suitable surfaces:** Sealed wood, cork, composite block (Granwood) and terracotta floors
- **Primary function:** Floor cleaning, protection and polishing
- **Finish:** Buffable, high-gloss protective wax layer
- **Coverage:** Up to approximately 200m² per 5L, depending on floor condition and application
- **Application:** Shake well and apply an even coat using a suitable applicator
- **Buffing:** Allow to dry to a haze, then buff using a compatible rotary floor machine and suitable buffing pad or brush
- **Maintenance:** Regular dry buffing; reapply to worn areas when the finish no longer responds to buffing
- **Floor preparation:** Apply only to suitably sealed floors, ideally sealed with Bourne Seal
- **Restrictions:** Do not apply over emulsion floor polishes or to incompatible flooring materials
- **Safety:** Solvent-based product; follow the manufacturer's safety data sheet and ventilation guidance
- **Usage:** Professional use only

Applications

Ideal for **cleaning, protecting and polishing sealed wood, cork, composite block and terracotta floors** in schools, halls, hotels and commercial premises. Suitable for **traditional floor maintenance**, restoring shine and revitalising worn
