Brasso Metal Polish - 1L

Variant code: 06-302

Brasso liquid is a metal polish used to clean brass, copper, pewter and chrome. This mild solvent has a fine abrasive which can be used to polish or restore CDs, DVDs, screens and pools.

Directions of use:

- Make sure you shake the Brasso well before using, with a soft cloth, apply liquid and rub in a circular motion.
- Leave for a few minutes.
- Buff off with a dry soft cloth until dry.

If Brasso is rubbed radically onto a surface which is scratched this can be smoothed out and reduce the effected area.
