

Winter Rock Salt – Half Pallet – 20 x 25kg

Variant code: 04-406/20

Winter Rock Salt is a **professional de-icing and gritting salt** designed to help prevent ice formation and melt existing snow and ice on outdoor surfaces. Made from naturally occurring sodium chloride, this brown granular rock salt provides an economical solution for winter maintenance in commercial, industrial and public environments.

Ideal for **car parks, pathways, driveways, access roads and pedestrian areas**, the salt can be applied before freezing conditions to help prevent ice forming or spread over existing snow and ice to assist melting. Its granular consistency makes it suitable for manual spreading and compatible gritting equipment.

Supplied in convenient **25kg sacks** for ease of use, Winter Rock Salt is available in **quarter pallet, half pallet and full pallet quantities** to accommodate different winter maintenance requirements. Due to the weight of these items, **all orders are delivered by a pallet carrier**, providing a practical solution for businesses requiring larger quantities of de-icing salt.

Product Features

- **Natural brown rock salt** for winter de-icing and gritting
- Helps prevent ice formation and melt existing snow and ice
- Suitable for car parks, pathways, driveways and access roads
- Granular consistency for effective spreading
- Suitable for manual application and compatible salt spreaders
- Supplied in convenient **25kg sacks** for ease of handling
- Available in quarter, half and full pallet quantities
- **Delivered by pallet carrier** due to product weight

Product Benefits

- Helps reduce slip hazards caused by snow and ice

- Supports safer pedestrian and vehicle access during winter
- Suitable for preventative gritting and reactive de-icing
- Provides an economical solution for winter maintenance
- Convenient 25kg sacks allow easier handling and distribution
- Multiple pallet options accommodate different usage requirements
- Helps businesses maintain access during freezing conditions

Technical Characteristics

- **Product type:** Winter rock salt
- **Material:** Naturally occurring sodium chloride
- **Colour:** Brown
- **Form:** Granular crushed rock salt
- **Sack size:** 25kg nominal
- **Quarter pallet:** 10 x 25kg sacks (250kg nominal)
- **Half pallet:** 20 x 25kg sacks (500kg nominal)
- **Full pallet:** 40 x 25kg sacks (1,000kg nominal)
- **Application:** Preventative gritting and snow and ice treatment
- **Application method:** Manual spreading or compatible gritting equipment
- **Delivery:** Pallet carrier
- **Storage:** Keep covered and protected from moisture
- **Precaution:** Avoid excessive application and follow local environmental and surface protection guidance

Applications

Ideal for **de-icing and gritting** car parks, pathways, driveways, private roads and pedestrian areas at schools, hospitals, offices and industrial premises. Helps **prevent ice formation and melt snow and ice** during freezing winter conditions.
