P-Screen Bubble/Bristle 60 day Urinal Mat with Enzymes - Linen Breeze - Pack of 6

Variant code: 05-655

P-Screen® 60-Day Enzymatic Urinal Screen is designed to provide **long-lasting odour control, splashback protection and enzyme-assisted urinal care** in busy commercial washrooms. Featuring a fresh **Linen Breeze fragrance**, it helps maintain a clean-smelling and welcoming environment throughout the replacement cycle. Its innovative **Triple Action Technology** combines dual fragrance delivery, beneficial bacteria and enzymes with a practical anti-splash screen, offering a comprehensive solution for everyday urinal maintenance.

The **active central core** provides a secondary fragrance and incorporates **beneficial bacteria and enzymes** that help target odour-causing deposits within the urinal. This biological action supports the breakdown of build-up associated with unpleasant smells and helps reduce **uric salt accumulation and the risk of drainage blockages**. The screen also features a **deep bubble and bristle design** engineered to minimise urine splashback and capture debris before it enters the waste outlet. Together, these features help maintain cleaner surrounding surfaces and support effective drainage.

Manufactured from **flexible EVA material**, the screen is designed to fit a variety of urinal shapes, including **waterless urinals**. Its durable, recyclable construction offers a practical alternative to frequently replaced conventional urinal screens, with **up to 60 days of controlled fragrance release** per screen. Installation is straightforward: position the screen inside the urinal and replace it as part of the regular washroom maintenance schedule. Supplied in a **pack of 6 Linen Breeze urinal screens**, it provides a convenient solution for maintaining multiple urinals in commercial and public facilities.

Product Features

- **Linen Breeze fragrance** provides a fresh, clean-linen-inspired scent
- **Up to 60 days of fragrance** per screen
- **Triple Action Technology** combines

suitable for a wider range of facilities
- **Controlled fragrance release** helps maintain freshness between cleaning visits
- **Longer replacement intervals** can reduce routine servicing requirements
- **Recyclable construction** supports responsible disposal where suitable facilities exist
- **No powered equipment required** simplifies installation and ongoing use
- **Pack of 6** provides a practical supply for commercial washroom maintenance

Technical Characteristics

- **Product Range:** P-Screen®
- **Product Type:** 60-Day Enzymatic Urinal Screen
- **Fragrance:** Linen Breeze
- **Fragrance Profile:** Fresh, Clean-Linen-Inspired
- **Primary Function:** Urinal Fragrance, Odour Control and Splashback Reduction
- **Technology:** Triple Action Technology
- **Fragrance System:** Dual Fragrance
- **Active Core:** Integrated Enzyme and Beneficial Bacteria Block
- **Biological Function:** Helps Target Odour-Causing Build-Up
- **Uric Salt Control:** Helps Reduce Accumulation
- **Anti-Splash Design:** Deep Bubble and Bristle Structure
- **Debris Protection:** Helps Capture Debris Before It Enters the Drain
- **Drainage Function:** Helps Maintain Liquid Flow
- **Fragrance Duration:** Up to 60 Days
- **Fragrance Release:** Controlled
- **Material:** Flexible EVA
- **Material Properties:** Flexible and Durable
- **Recyclability:** Recyclable Where Suitable Facilities Exist
- **Urinal Compatibility:** Various Urinal Shapes
- **Waterless Urinal Compatibility:** Yes
- **Approximate Individual Weight:** 130g
- **Installation Method:** Place Directly Inside the Urinal
- **Installation Tools Required:** None
- **Power Source:** None Required
- **Batteries Required:** No
- **Separate Dispenser Required:** No
- **Recommended Replacement:** Approximately Every 60 Days

- **Suitable Locations:** Commercial and Public Washrooms
- **Intended Use:** Urinal Deodorising, Splashback Reduction and Enzyme-Assisted Urinal Care
- **Pack Quantity:** 6 Screens
- **Packaging Format:** Pack of 6
- **Maintenance:** Replace During Routine Washroom Servicing
- **Safety:** Follow Current Product Label and Handling Instructions

Applications

Ideal for **commercial urinal deodorising, splashback reduction and enzyme-assisted washroom maintenance** in offices, schools, universities, hospitals, care homes, hotels, restaurants, pubs, bars, shopping centres, stadiums, leisure centres, transport facilities and public conveniences. Particularly suitable for **high-traffic washrooms requiring extended fragrance performance and reduced maintenance frequency**, the screen combines a fresh **Linen Breeze fragrance** with an active enzyme core and deep bubble and bristle design. Suitable for conventional and waterless urinals, it helps maintain a fresher environment while reducing splashback, capturing debris and managing deposits associated with unpleasant odours.

Property	Value
Fragrance	Linen Breeze
Area of Use	Suitable for urinals in public and commercial washrooms to control unpleasant odours, reduce splashing and help prevent drain blockages.
CLP	corrosive, irritant
How to Use	Remove from packaging and place directly into the urinal, ensuring it sits securely over the drainage area. Replace approximately every 60 days to maintain freshness and effectiveness.
Pack Size	Pack of 6
