Canadian Rigger Glove - XXXL - Grey

Variant code: 22-A210GRRXXXL

Take your hand protection to the next level with our **Canadian Rigger Glove in Grey**. Specifically engineered for demanding environments, these gloves offer a perfect balance of rugged durability and breathable comfort. Whether you are working on a high-stakes construction site or managing a weekend landscaping project, these gloves are the industry standard for reliable safety.

Key Features & Benefits

- **Premium Cow Split Leather:** Crafted from high-grade leather, providing exceptional resistance against abrasions, punctures, and tears.
- **Enhanced Safety Zones:** Features a reinforced **patch palm** and **vein protection** to shield your most vulnerable areas during heavy lifting and material handling.
- **Breathable Cotton Back:** The heavyweight cotton backing ensures maximum ventilation, reducing sweat and keeping your hands cool during extended shifts.
- **Knuckle Protection:** An integrated leather knuckle strap provides an extra layer of defense against bumps and scrapes in tight workspaces.
- **Rubberised Safety Cuff:** The stiffened cuff offers additional wrist protection and allows for quick removal if the glove becomes snagged.

Ideal Applications

These multi-purpose rigger gloves are the preferred choice for professionals in:

- **Construction & Scaffolding:** Handling rough timber, steel, and masonry.
- **Landscaping & Agriculture:** Protection against thorns, soil, and machinery.
- **Logistics & Warehousing:** Safe manual handling and pallet shifting.
- **DIY & Gardening:** Heavy-duty home maintenance and yard work.

Frequently Asked Questions (FAQ)

Q: Are these gloves suitable for welding? A: While cow split leather is heat-resistant, these are designed for general handling. For dedicated welding, we recommend a full-leather gauntlet with Kevlar stitching.

Q: How do I clean my Canadian Rigger Gloves? A: Leather gloves should not be machine washed. Brush off excess dirt and wipe with a damp cloth. Avoid direct heat when drying to prevent the leather from becoming brittle.

Q: What is the difference between a "Rigger" and a "Driver" glove? A: Rigger gloves feature a safety cuff and a cotton back for breathability and wrist protection. Driver gloves are typically all-leather and fit more snugly for tasks requiring higher dexterity.
