

Chainmail Gauntlet 45cm – M – Silver

Variant code: 22-AC10SIRM

Chainmail Gauntlet (45cm) – Stainless Steel Silver Finish

Take your protection and precision to the next level with our **Premium 45cm Chainmail Gauntlet**. Engineered for high-stakes environments—from industrial food processing to professional wood carving—this extended-sleeve glove provides unrivaled defence against cuts, slashes, and abrasions.

Crafted from thousands of individually welded **316L stainless steel rings**, this gauntlet offers a "second skin" feel without compromising on safety. The 45cm length ensures that not just your hand, but your entire forearm is shielded from accidental slips and sharp edges.

Key Features & Benefits

- **Full Forearm Coverage:** The **45cm extended cuff** provides comprehensive protection from the fingertips all the way to the elbow, making it ideal for handling large blades or jagged materials.
- **Industrial-Grade Material:** Made from **high-tensile 316L stainless steel**, which is naturally corrosion-resistant, antimicrobial, and incredibly durable.
- **Ambidextrous Design:** No need to buy separate pairs; our clever design fits comfortably on both the **left and right hand** by simply turning it inside out.
- **Hygienic & Food Safe:** Completely non-porous and easy to sanitise, meeting the strictest standards for **meat processing, butchery, and commercial kitchens**.
- **Adjustable Fit:** Features a secure, adjustable wrist and arm strap to prevent slipping during intensive tasks, ensuring the gauntlet stays perfectly in place.

Ideal Applications

This gauntlet isn't just for show—it's a workhorse for professionals who value their safety:

Butchery & Meat Processing: Essential for deboning, carving, and breaking down large carcasses.

Woodworking & Whittling: Protects against erratic slips when using chisels or drawknives.

Glass & Metal Handling: Safe movement of sharp-edged sheets and industrial offcuts.

Oyster Shucking: Provides the grip and protection needed for heavy-duty seafood prep.

Historical Reenactment: A high-quality, polished silver finish makes it a stunning addition to medieval or fantasy armor sets.

Product Specifications

Feature	Specification
Material	316L Stainless Steel (Welded Rings)
Length	45cm (17.7 inches)
Colour	Polished Silver
Size	Universal / Adjustable
Cut Level	ANSI/ISEA Level A9 (Highest Protection)
Weight	Approx. 350g - 450g (Varies by ring density)

Frequently Asked Questions (FAQ)

Q: Is the gauntlet sold as a pair?

A: No, these are typically sold as **single units**. Because the design is ambidextrous, one gauntlet can be used on either hand.

Q: How do I clean the chainmail?

A: We recommend washing with hot, soapy water or running it through a commercial dishwasher. Ensure it is dried thoroughly to maintain its polished silver luster.

Q: Can this stop a needle or a vertical stab?

A: While chainmail is world-class at stopping

slashes and slices, it is not "puncture-proof" against very fine needles or high-force vertical stabs, as the point may pass through the rings.

Q: Will it rust?

A: No. Our 316L stainless steel is specifically chosen for its resistance to rust and oxidation, even in wet kitchen environments.

Pro-Tips for Usage

- **The "Cotton Liner" Trick:** For maximum comfort during long shifts, wear a thin cotton or nylon glove underneath the gauntlet. This absorbs sweat and prevents the steel from feeling cold against your skin.
- **Tighten the Straps:** A loose gauntlet reduces dexterity. Ensure the wrist strap is snug so the fingertips of the glove align perfectly with your own.
- **Storage:** Hang the gauntlet by the cuff when not in use. This allows for airflow and prevents the rings from kinking.
