Classic Double Palm Rigger Glove - XL - Green

Variant code: 22-A229GNRXL

Classic Double Palm Rigger Glove – Forest Green

When the job demands more than just a standard glove, the **Classic Double Palm Rigger** steps up. Designed for heavy-duty protection without sacrificing the "feel" of the task, these gloves are a staple for construction, landscaping, and industrial environments.

The standout feature is the **reinforced double-layered leather** across the palm, thumb, and forefinger. This targeted reinforcement ensures that the areas most prone to wear and tear last twice as long, providing a cost-effective solution for high-friction manual labour.

Key Features & Specifications

- **Premium Split Leather:** Crafted from high-quality cowhide for superior abrasion resistance and durability.
- **Double Layer Protection:** An extra leather patch on the palm and key grip points protects against punctures and friction burns.
- **Heavy-Duty Drill Backing:** The breathable green cotton drill backing allows for airflow, keeping hands cool during long shifts.
- **Rubberised Safety Cuff:** The stiffened 2.5-inch cuff protects the wrists from debris and allows for quick "flick-off" removal in case of emergencies.
- **Vein Protection Patch:** An integrated leather patch covers the pulse point on the wrist for added safety.
- **Internal Fleece Lining:** A soft, palm-area lining absorbs sweat and provides comfort during extended use.

Ideal Applications

These gloves are engineered for versatile performance across various sectors:

- **Construction & Masonry:** Handling bricks, blocks, and timber.
- **Landscaping:** Cleaning brambles, handling mulch, and heavy gardening.
- **Logistics & Warehousing:** Moving pallets and operating manual machinery.
- **DIY & Home Renovation:** Demolition and general site clearance.

Frequently Asked Questions (FAQ)

Are these gloves waterproof? While the leather offers some natural resistance to light moisture, they are not waterproof. For wet conditions, we recommend applying a leather conditioner or opting for a fully coated nitrile glove.

What size do these come in? Our Classic Riggers are "One Size Fits Large," which is the industry standard for rigger gloves, designed to fit the average adult male hand comfortably while allowing for easy removal.

Can I wash these gloves? Machine washing is not recommended as it can strip the natural oils from the leather, causing it to become stiff and brittle. To clean, brush off dry dirt and wipe with a damp cloth.

Technical Insights for Professionals

Safety Rating Note: These gloves are designed to meet **EN388 standards** for mechanical risks. When assessing PPE for your site, prioritise the 4-digit code (Abrasion, Cut, Tear, Puncture) to ensure the leather thickness meets your specific risk assessment requirements.

Pro-Tips for Longevity

- **Rotation:** If using them daily, rotate between two pairs to allow the leather to fully dry from perspiration, which prevents premature "rotting" of the internal fibres.

- **Storage:** Store in a cool, dry place away from direct sunlight to prevent UV damage to the green drill backing and hardening of the leather.
