Cleanfix TW Compact - Forwards and Backwards Carpet Cleaning Machine

Variant code: 16-TWCOMPACT

Cleanfix TW Compact is a professional **self-contained carpet cleaning machine** designed to deliver fast, efficient and high-quality carpet cleaning performance in commercial environments. Featuring the ability to clean in both forward and reverse directions, this innovative machine maximises productivity while providing exceptional cleaning results across large carpeted areas.

Engineered for efficiency, the TW Compact combines powerful spray extraction technology with a self-contained cleaning system that allows operators to clean effectively in both directions without compromising performance. This unique capability significantly improves productivity, making it ideal for maintaining large carpeted spaces in less time. Its generous tank capacity and wide cleaning width enable extended cleaning periods with fewer interruptions, helping operators cover more ground efficiently while achieving consistent cleaning results.

Built to Cleanfix's renowned quality standards, the TW Compact offers robust construction, simple operation and dependable performance for everyday commercial use. Its compact yet highly capable design makes it suitable for professional cleaning contractors and facilities management teams seeking a reliable carpet cleaning solution that delivers excellent cleaning results with minimal operator effort.

Product Features

- **Self-contained carpet cleaning machine**
- Unique **forward and reverse cleaning capability**
- Wide cleaning path for increased productivity
- Large-capacity solution and recovery system
- Efficient spray extraction cleaning technology
- Simple and intuitive operation
- Robust commercial-grade construction

Product Benefits

- Cleans effectively in both forward and backward directions
- Reduces cleaning times across large carpeted areas
- Minimises downtime through large tank capacity
- Provides consistent, professional cleaning results
- Improves operator productivity and efficiency
- Built for long-term reliability in demanding environments
- Easy to operate and maintain

Technical Characteristics

- Professional **self-contained carpet extraction machine**
- Forward and reverse cleaning operation
- Wide cleaning width for large area coverage
- Large-capacity solution and recovery tanks
- Commercial-duty construction
- Designed for high-productivity carpet maintenance
- Suitable for routine and deep carpet cleaning applications

Applications

Cleanfix TW Compact is ideal for hotels, offices, schools, healthcare facilities, conference centres, care homes and commercial buildings where large carpeted areas require regular professional cleaning. Its ability to clean both forwards and backwards, combined with its large capacity and efficient design, makes it particularly suitable for facilities management teams and contract cleaners seeking maximum productivity and outstanding carpet cleaning performance.
