

Clinell® Universal Wipes – Pack of 200

Variant code: 02-605030

Clinell® Universal Wipes are professional-grade disinfectant and detergent wipes designed to clean and disinfect hard surfaces and **non-invasive medical devices** in a single step. Supplied in a convenient **pack of 200**, these ready-to-use wipes contain Clinell's unique patented antimicrobial formula, providing an effective, skin-friendly solution that replaces the need for multiple cleaning and disinfecting products. Trusted throughout healthcare environments, they deliver rapid, reliable infection prevention while simplifying everyday cleaning routines.

Clinell® Universal Wipes have been independently proven to kill **at least 99.999% of germs** and comply with a wide range of European standards including **EN1275, EN1276, EN12054, EN14245, EN14476, EN14561, EN14562 and EN14563**. Their advanced formulation combines multiple biocides with different modes of action, helping reduce the risk of microbial resistance while providing broad-spectrum antimicrobial performance. Suitable for routine cleaning and disinfection, the wipes are ideal for helping control Healthcare Associated Infections (HCAs) through effective infection prevention and control practices.

Designed for professional healthcare, commercial and public environments, Clinell® Universal Wipes provide a convenient all-in-one cleaning and disinfection solution. The resealable pack helps maintain wipe moisture between uses, ensuring consistent performance whenever required. **Do not macerate after use.**
