Colour-Coded Stockinette Cleaning Cloth - Pack of 10 - Red

Variant code: 12-621R

Colour-Coded Stockinette Cleaning Cloths are durable and highly absorbent professional cleaning cloths designed for hygienic multi-surface cleaning across commercial, industrial and domestic environments. Manufactured from quality stockinette material, these reusable cloths deliver excellent absorbency, durability and reliable cleaning performance while supporting colour-coded hygiene systems to help minimise cross-contamination.

Ideal for professional cleaners, janitorial teams and facilities maintenance environments, these stockinette cloths are engineered for heavy-duty everyday cleaning tasks. Their ultra-absorbent construction efficiently handles spills, surface wiping and polishing while remaining soft enough for delicate surfaces such as glass, stainless steel and laminates. The colour-coded system allows separate cloth allocation for kitchens, washrooms, food preparation and general cleaning areas to support safer and more hygienic cleaning procedures.

Supplied in a practical **pack of 10 reusable cloths**, these durable stockinette cleaning cloths provide a cost-effective and long-lasting cleaning solution suitable for offices, hospitality venues, schools, healthcare facilities and commercial cleaning operations.

Product Features

- **Professional stockinette cleaning cloths**
- Colour-coded hygiene system
- Highly absorbent stockinette material
- Reusable and washable construction
- Durable heavy-duty performance
- Suitable for multi-surface cleaning
- Soft yet strong cleaning action
