Crystale Dishwash Salt - 2kg

Variant code: 04-417

Crystale Dishwasher Salt is a **high-quality refined dishwasher salt** designed to improve water softening performance and help protect dishwashers against limescale build-up. Specially produced for use in dishwashers with an integrated water softening system, its pure salt formulation helps maintain efficient appliance operation while reducing the risk of **limescale marks on dishes, glasses and cutlery**.

Featuring **larger, longer-lasting salt granules**, the product is designed to dissolve gradually within the dishwasher's salt reservoir, supporting effective regeneration of the built-in water softener. By helping reduce the hardness of the water used during washing, it contributes to **improved cleaning performance** and helps minimise the mineral deposits that can leave white marks and cloudy residues on tableware.

Made from **refined salt with no added ingredients**, Crystale Dishwasher Salt provides a straightforward solution for regular dishwasher maintenance. Its environmentally conscious sourcing is an additional consideration for users looking to make more responsible purchasing choices. Supplied in a convenient **2kg bag**, it is suitable for domestic and compatible light commercial dishwashers, particularly in hard water areas where effective water softening is essential.

Product Features

- **High-quality refined dishwasher salt** designed for maximum water softening effectiveness
- **Large salt granules** provide gradual dissolution and longer-lasting performance
- **Effective water softening** supports the dishwasher's built-in water softener
- Helps prevent **limescale marks and mineral deposits** on dishes and glassware
- Supports **improved dishwashing performance** in hard water conditions
- **Protects dishwasher components** by helping reduce limescale accumulation
- **No added ingredients** for straightforward dishwasher salt replenishment

- Designed for use in **dedicated dishwasher salt reservoirs**
- Suitable for regular dishwasher maintenance
- **Environmentally conscious salt sourcing** as described in the supplied product information
- Suitable for compatible domestic and light commercial dishwashers
- Supplied in a **2kg bag**

Product Benefits

- **Reduced limescale build-up** helps protect the dishwasher's internal water softening system
- **Cleaner-looking dishes** by helping prevent mineral marks and cloudy deposits
- **Improved washing results** support the performance of dishwasher detergents in hard water areas
- **Longer-lasting granules** provide controlled dissolution during water softener regeneration
- **Appliance protection** helps minimise the effects of hard water on compatible dishwasher components
- **Refined salt quality** provides a reliable supply for the dishwasher's regeneration system
- **Additive-free formulation** avoids unnecessary ingredients in the dishwasher salt reservoir
- **Simple replenishment** makes regular dishwasher maintenance straightforward
- **Reduced mineral deposits** helps maintain the appearance of glassware, crockery and cutlery
- **Practical pack size** provides a convenient supply for routine use

Technical Characteristics

- **Brand:** Crystale
- **Product Type:** Dishwasher Salt
- **Primary Function:** Dishwasher Water Softener Regeneration
- **Pack Weight:** 2kg
- **Packaging Format:** Bag
- **Form:** Coarse Salt Granules
- **Composition:** Refined Sodium Chloride
- **Additives:** No Added Ingredients
- **Granule Type:** Large, Slow-Dissolving Granules
- **Primary Application:** Water Softening in

Compatible Dishwashers
- **Secondary Function:** Helps Prevent Limescale Deposits and Water Marks
- **Suitable Equipment:** Dishwashers with a Dedicated Salt Reservoir and Built-In Water Softening System
- **Water Conditions:** Particularly Beneficial in Hard Water Areas
- **Application Method:** Pour into the Dishwasher's Dedicated Salt Reservoir According to the Appliance Manufacturer's Instructions
- **Replenishment:** Refill When Indicated by the Dishwasher's Salt Warning Light or Maintenance Instructions
- **Compatibility:** Follow the Dishwasher Manufacturer's Salt Requirements
- **Quantity:** Each
- **Storage:** Store Sealed in a Cool, Dry Place Away from Moisture
- **Precaution:** Do Not Add Directly to the Detergent Dispenser or Use as a Substitute for Dishwasher Detergent

Applications

Ideal for **water softening and limescale prevention** in domestic and compatible light commercial dishwashers. Particularly suitable for **hard water areas**, helping protect dishwasher components and reduce mineral marks on dishes, glasses and cutlery.

Property	Value
Colour	White
Fragrance	Odourless
pH	5-8
Size	2 kg
Area of Use	Suitable for dishwashers with a built-in water softener. Helps prevent limescale build-up and maintain effective cleaning performance, particularly in hard water areas.
How to Use	Fill the dishwasher's salt reservoir with Crystale Dishwasher Salt, following the manufacturer's instructions. Secure the cap and refill when the salt indicator lights up. Do not add to the detergent compartment.
Ingredients	Sodium Chloride (NaCl)
