Dammit Emergency Clay Drain Mats - 45x45cm - Pack of 2

Variant code: 23-4010/X

Dammit clay drain mats are supplied in boxes of 2; and are ideal for use on standard square drains.

Darcy manufacture Dammit emergency clay drain plugging mats to instantly seal a drain to prevent spilt oils and chemicals flowing into storm drain and out to controlled waters.

Our drain plugging mats fit the contours of drains to create a complete seal on uneven or broken drains. Due to their flexibility you can easily plug misshapen drains.

Dammit clay drainmats are treated with a formula which prevents mould growth and anti-freeze properties so the mat remains flexible down to -20°C.

Dammit mats should be placed in areas of high risk.
