SC Johnson Swarfega® Sanitise - Alcohol based Hand Sanitiser Gel - 750ml

Variant code: 10-CRA360

SC Johnson Swarfega® Sanitise is a professional alcohol-based hand sanitiser gel designed to provide **rapid and convenient hand disinfection** for outdoor workers and industrial environments. Developed for use within the Skin Safety Cradle system, the fast-acting gel formulation helps maintain effective hand hygiene where access to traditional hand washing facilities may be limited.

The instant sanitising gel effectively disinfects hands quickly and conveniently, making it suitable for mobile workers, engineers, construction personnel and field-based operations. Its alcohol-based formulation supports high standards of workplace hygiene while remaining practical for frequent use throughout the working day.

Designed as a refill for the **Skin Safety Cradle system**, the hygienic cartridge format supports controlled dispensing and easy replacement in mobile hygiene stations and workplace vehicles. The portable system is particularly suitable for environments where rapid hand sanitising is essential during off-site work activities.

Ideal for outdoor workplaces, mobile service vehicles, engineering operations and industrial environments, the sanitiser helps support workplace hygiene compliance and user safety. Use biocides safely and always read the label and product information before use.

Product Features

- Professional **alcohol hand sanitiser gel**
- Rapid and convenient hand disinfection
- Suitable for outdoor and mobile work environments
- Fast-acting sanitising gel formulation
- Refill for the **Skin Safety Cradle system**
- Hygienic controlled dispensing format
