

SC Johnson Deb InstantFOAM™ Complete PURE – Hand Sanitiser – 1L

Variant code: 10-DIS1000ML

SC Johnson Deb InstantFOAM™ Complete PURE is a professional foaming hand sanitiser designed to provide **rapid and highly effective hand hygiene protection** in hygiene-critical environments. Developed for use in closed and semi-closed facilities such as food manufacturing sites, cruise ships and long-term care environments, the advanced foam formulation delivers broad-spectrum antimicrobial performance while remaining gentle on the skin.

The highly effective sanitising formula is proven to eliminate **99.999% of many common germs** within seconds, helping support high hygiene standards in demanding workplaces. Dispensed as an instant foam, the product provides improved user control compared to liquid sanitisers by helping prevent dripping and splashing during application.

Its non-drying formulation has been independently tested and proven to help maintain skin moisture levels, supporting skin comfort even with frequent daily use. The **perfume-free and dye-free composition** helps reduce the potential for allergic reactions and irritation, making it suitable for sensitive skin environments.

Certified as **NSF E-3 rated**, the sanitiser is suitable for use in and around food processing areas. The dermatologist-tested hypoallergenic formulation is designed for sensitive skin and supports reliable hygiene management in professional environments requiring effective and convenient alcohol-free foam sanitising performance.

Product Features

- Professional **foam hand sanitiser**
