SC Johnson Deb Skin Safety Van Cradle - 3-Step System Dispenser Starter Kit Including Refills - Each

Variant code: 10-DCSP01PR

SC Johnson Deb Skin Safety Van Cradle is a **complete 3-step skin care system starter kit** designed to help protect, cleanse and sanitise hands in mobile working environments. Developed specifically for engineers, service technicians, utilities workers, transport operators and field-based personnel, this compact solution provides essential skin care products in a convenient wall-mounted cradle suitable for vehicles, work cabins and other confined spaces.

The system follows a comprehensive **3-step skin care programme**, helping users maintain healthy skin throughout the working day. The kit includes products to **protect the skin before work, cleanse hands during and after tasks, and sanitise when hand washing facilities are unavailable**, supporting workplace hygiene and skin health wherever employees are working.

Designed for environments where space is limited, the compact van cradle securely stores and dispenses the included refills while keeping products easily accessible. The durable mounting system makes it ideal for installation in service vans, maintenance vehicles, site cabins, workshops and temporary workspaces, ensuring skin care products are always available at the point of need.

Supplied as a **complete starter kit including refills**, the SC Johnson Deb Skin Safety Van Cradle provides a practical and professional solution for organisations looking to support employee wellbeing, improve hand hygiene standards and promote best-practice skin care in mobile and remote working environments.
