SC Johnson Deb Skin Safety Van Cradle 3-Step System Dispenser - Refills Sold Separately

Variant code: 10-ACC729

SC Johnson Deb Skin Safety Van Cradle 3-Step System Dispenser is a professional mobile skin care solution designed to provide a **complete 3-step skin protection, cleansing and sanitising system** in compact working environments. Ideal for mobile vans, work cabins and confined spaces, the cradle system helps support effective hand hygiene where access to traditional washroom facilities may be limited.

The integrated system contains dedicated dispensers for **protective cream, waterless hand cleaner and hand sanitiser**, helping workers maintain skin care and hygiene throughout the working day. Designed for practical use in mobile environments, the products do not require water during application, making the system particularly suitable for remote and off-grid operations.

The compact cradle design allows organised installation within vehicles and workspaces while supporting easy access to hand hygiene products. Its durable construction makes it suitable for demanding commercial and industrial environments where reliable hygiene management is essential.

Ideal for engineers, mobile technicians, construction teams, transport operators and field-based workers, the system supports improved skin protection and hygiene compliance in environments where space and water access are restricted. Refills are supplied separately.

Product Features

- Professional **3-step skin care dispenser system**
- Includes dispensers for protective cream, hand cleaner and sanitiser
- Designed for **mobile and confined work environments**
- Products can be used **without water**
- Compact and organised cradle mounting system
- Durable professional construction
