SC Johnson Deb Solopol® - Heavy Duty Hand Cleaner - Case of 4 x 2L

Variant code: 10-SOL2LT

SC Johnson Deb Solopol is a **heavy duty hand cleaner** developed for industrial environments where effective removal of heavy workplace soiling is required. Manufactured by SC Johnson Professional, the Solopol range is designed to deliver high-performance cleansing while supporting skin care and workplace compatibility across demanding industrial applications.

The formulation uses a **highly effective patented solvent-free formula**, engineered to provide the cleaning performance normally associated with solvent-based products while helping reduce skin irritation risks. Its **unique surfactant system** penetrates, lifts and solubilises ingrained oil, grease, carbon black, lubricants, water-based lacquers and resins, helping improve cleaning efficiency while minimising re-deposition of soil residue during washing.

The product contains **Astopon® natural scrubbing agent**, produced from refined walnut shell powder, providing effective non-abrasive scrubbing action that rinses away easily to help prevent blocked drains and pipes. Added emollients help prevent skin dryness, leaving the skin feeling smooth after use, while the **low pH formulation (4.0–5.0)** supports the skin's natural acid mantle and bacteria balance.

SC Johnson Deb Solopol is **EU Ecolabel certified**, reflecting reduced environmental impact across its lifecycle. The formulation is also **silicone-free**, making it suitable for environments involving paint and surface coating processes. Independent testing confirms compatibility with rubber production and vulcanisation processes, supporting use in specialist industrial applications.

Product Features

- **Heavy duty hand cleaner** for industrial environments
- **Patented solvent-free formula** for powerful cleansing
- Contains **Astopon® natural scrubbing agent**
- Removes oil, grease, carbon black and

industrial soils
- **Low pH formulation** to support skin condition
- **Silicone-free** and compatible with rubber production processes

Product Benefits

- Delivers effective removal of heavy workplace contaminants
- Helps reduce risk of skin irritation during frequent use
- Supports skin comfort with added emollients
- Minimises residue redeposition during hand washing
- Suitable for paint, coating and rubber manufacturing environments
- Supports environmentally conscious workplace hygiene programmes

Technical Characteristics

- Available in **2L and 4L cartridge formats**
- Designed for compatible SC Johnson Professional dispensers
- Solvent-free formulation with natural scrubbing agents
- EU Ecolabel certified product
- Compatible with industrial glove and process environments
- Store in a cool, dry environment and follow label instructions

Applications

SC Johnson Deb Solopol is suitable for use in **engineering workshops, automotive environments, manufacturing facilities, maintenance operations and heavy industrial workplaces** where workers regularly handle grease, lubricants, oils and ingrained industrial contaminants. Its solvent-free formulation and skin conditioning properties make it particularly suitable for high-frequency professional hand cleaning programmes where effective cleansing and skin care are equally important.

Property	Value
Fragrance	Citrus
Volume (L)	2
Case Size	4 x 2L

Tel: 01626 355177
Email: info@aukhygiene.com

Property	Value
pH	4.4
Area of Use	Manufacturing, Construction, Automotive, Agriculture & Landscaping
How to Use	Apply one dose onto dry hands and rub thoroughly to loosen dirt. Add a little water and continue rubbing. Rinse thoroughly with plenty of water and dry well.
Chemical Colour	Beige
Cleansing Performance	Removes Oil, Grease, Carbon Black and Lubricants
Product format	2L Cartridge
