SC Johnson Deb Stokoderm® Sun Protect 30 PURE - 1L

Variant code: 10-SUN1L

SC Johnson Deb Stokoderm Sun Protect SPF30 PURE is a **high-protection skin protection cream** designed for outdoor workers and industrial personnel exposed to harmful ultraviolet radiation. Manufactured by SC Johnson Professional, the Stokoderm range is developed to help protect skin from workplace environmental hazards while supporting skin comfort and conditioning during daily use.

The advanced formula provides **SPF30 UVB protection**, helping extend the skin's natural protection time against harmful UVB rays. It also delivers **UVA protection** in accordance with European recommendations and provides additional **UVC protection** against artificial UVC radiation generated during certain industrial processes such as welding. While offering supplementary protection against workplace UVC exposure, the product should always be used alongside appropriate personal protective equipment where required.

Its **water-resistant formulation** helps maintain protection during outdoor working conditions, including exposure to perspiration and wet environments. The cream absorbs quickly into the skin and leaves a **non-greasy finish**, encouraging regular application without affecting dexterity when handling tools, equipment or machinery.

To support skin health, the formulation contains **Vitamin E, Jojoba Oil, Cocoa Butter, Panthenol, Caprylic/Capric Triglyceride and Glycerin**, helping to soothe, moisturise and condition the skin during prolonged exposure to environmental conditions. The **perfume-free formulation** is suitable for individuals who prefer products without added fragrance and for those with fragrance sensitivities.

Product Features

- **SPF30 skin protection cream** for occupational use
- Provides **UVB, UVA and additional UVC protection**
- **Water-resistant formula** for outdoor working conditions

- **Non-greasy finish** with rapid skin absorption
- Contains **Vitamin E, Jojoba Oil, Cocoa Butter, Panthenol and Glycerin**
- **Perfume-free formulation** for sensitive users

Product Benefits

- Helps protect skin from harmful UV exposure during work
- Supports outdoor workers in changing weather conditions
- Provides additional protection during welding and industrial processes
- Encourages regular use through fast absorption and comfort
- Helps maintain skin hydration and condition
- Suitable for fragrance-sensitive users and workplaces

Technical Characteristics

- Supplied in **100ml tubes**
- SPF30 protection against UVB rays
- Conforms to European UVA protection recommendations
- Water-resistant formulation suitable for outdoor use
- Contains multiple skin conditioning ingredients
- Use in conjunction with appropriate PPE where required

Applications

SC Johnson Deb Stokoderm Sun Protect SPF30 PURE is suitable for **construction workers, utility contractors, agricultural workers, landscapers, highways personnel, transport operators and other outdoor professionals** exposed to sunlight during the working day. It is also suitable for workers exposed to **artificial UVC radiation from industrial processes such as welding**, when used alongside appropriate protective equipment. The combination of broad-spectrum UV protection, water resistance and skin conditioning ingredients makes it ideal for workplaces where skin protection and comfort are essential.
